

Chapter 5 Personal Computer Data Communications

definitions

- bit** (page 1)
A **bit** is a binary digit, a one or a zero, represented in a computer using electrical, magnetic and optical technology.
- broadband network** (page 6)
Broadband networks are high speed networks that have special hardware allowing data to move across the network more quickly.
- byte** (page 2)
A **byte** is an 8-bit word. The term was coined to refer to the word length for early computers, which were mostly 8-bit machines.
- byte-addressable memory** (page 2)
The size of a computer's memory is measured in bytes, even though 8-bit computers are no longer commonly used. This system, known as **byte-addressable memory**, keeps the size of a computer's memory and the memory addresses used by software independent from the computer's word length. It also makes it easier to compare the size of computer memories for systems that have different word lengths.
- communications protocol** (page 3)
A **communications protocol** is a set of rules defining a data communications method, including the electronic signals to be used, how fast the data should be sent, and so on.
- data bus** (page 2)
A **data bus** is a set of wires used for data communication, connecting the various parts of the computer, such as the Random Access Memory (RAM) and the Central Processing Unit (CPU).
- data communication** (page 2)
Data communication is the movement of bits of information from one place to another, both inside a computer and between computers and other digital devices, such as printers, cameras, or other computers on a network.
- data communication standards** (page 3)
Data communication standards include the communications protocol, along with equipment specifications, such as the type of connectors and cables to be used.
- driver** (page 5)
A **driver** is a computer program that manages a device or a connection between devices. *USB* connections are simple and do not need drivers, but sometimes the device connected to the computer needs a driver so that it will work properly.
- Electronics Industries Alliance (EIA)** (page 3)
The **Electronics Industries Alliance (EIA)**, formerly known as the *Electronics Industries Association*, is an organization of computer and electronic equipment manufacturers.
