

POWER COST ADJUSTMENT EXPLAINED

Locally owned cooperative utilities are nonprofit organizations.

When our utility charges members for power, there is no profit collected. The cost of power is passed through from our wholesale power supplier (CIPCO) to our members.

1

The cost to generate or buy electricity fluctuates.

This is due to changing fuel costs, weather, equipment outages, and the demand for electricity.

2

Adjustments are made to reflect the true cost of power each month.

Base rates are collected from members each month, representing our projected revenue requirements. A Power Cost Adjustment charge accommodates monthly fluctuations in power costs.

3

Members' bills show the adjustment **↑** or **↓**.

This adjustment is made on the member's bill to reflect any changes from their base charge for that month. This can be a charge some months and a credit other months.
