## **Shift Double Take:**

**Double take** Judith Hermann,1999      **Television for Women** Rachel Moseley,Helen Wheatley,Helen Wood,2016-11-10  
Television for Women brings together emerging and established scholars to reconsider the question of television for women In the context of the 2000s when the potential meanings of both terms have expanded and changed so significantly in what ways might the concept of programming addressed explicitly to a group identified by gender still matter The essays in this collection take the existing scholarship in this field in significant new directions They expand its reach in terms of territory looking beyond for example the paradigmatic Anglo American axis and also historical span Additionally whilst the influential methodological formation of production text and audience is still visible here the new research in Television for Women frequently reconfigures that relationship The topics included here are far reaching from television as material culture at the British exhibition in the first half of the twentieth century women s roles in television production past and present to popular 1960s television such as The Liver Birds and in the twenty first century highly successful programmes including Orange is the New Black Call the Midwife One Born Every Minute and Wanted Down Under This book presents ground breaking research on historical and contemporary relationships between women and television around the world and is an ideal resource for students of television media and gender studies      **Exploratory Programming for the Arts and Humanities, second edition** Nick Montfort,2021-05-18 A new edition of a book for anyone who wants to learn programming to explore and create with exercises and projects to help readers learn by doing This book introduces programming to readers involved with the arts and humanities there are no prerequisites and no previous knowledge of programming is assumed Nick Montfort reveals programming to be not merely a technical exercise within given constraints but a tool for sketching brainstorming and inquiry He emphasizes programming s exploratory potential its facility to create new kinds of artworks and to probe data for new ideas The book is designed to be read alongside the computer allowing readers to program while making their way through the chapters It offers practical exercises in writing and modifying code and outlines free projects that allow learners to pursue their own interests      **Cambridge English Pronouncing Dictionary with CD-ROM** Daniel Jones,2011-10-06 New edition of the classic work by Daniel Jones includes up to date entries and new study pages      **Double Take** ,2000 Collection of essays on the thoughts and reflections of filmmakers technicians etc      **Premier Piano Course, Technique 3** Dennis Alexander,Gayle Kowalchyk,E. Home Office. Committee on Employment of Women and Young Persons on the Two Shift System,1920 **Finding the Figure in the Carpet** Lee McKay Johnson,2006-12-05 In his 1896 short story *The Figure in the Carpet* James sets forth a riddle for his critical readers as he approaches the major phase in his career He imagines a fictional novelist Hugh Vereker who tantalizes his critics with the idea of a single thread a design woven throughout all of his major works hidden in plain sight The design Vereker says is as obvious as a foot stuck in a shoe but the distinguished novelist is convinced no one will ever see it One critic Corvick however during a trip to India has an astonishing flash of revelation he sees the figure and the discovery is immense When Corvick returns and shares his epiphany with Vereker the novelist assures him that his discovery is precisely accurate there is not a single wrong note But Corvick dies in a road accident before he can write his definitive book on Verekers secret design My study will show the reader that there is a distinct figure in the carpet in the works of Henry James himself But James only uses the figure in a select group of his major novels and tales all six of which we will examine here These major works are all experimental and radical and show James allowing himself the artistic freedom to follow his own arcane and personal path The pattern is fully manifested in *The Turn of the Screw* in 1897 and remains the consistent thread all the way through the Masters final completed novel *The Golden Bowl* in 1904 I began writing about the relation of writing to painting and how James translates structural aspects of the silent art of painting into prose James borrows both silence and simultaneity from the painter his brother of the brush and experiments with their narrative equivalents I saw with increasing clarity that James admiration of the powers of painting led him into depicting nonverbal aspects of consciousness in language Finally I saw the whole system lock into place everything fit The figure in the carpet was revealed as visible silence With only a minute adjustment of focus I suddenly saw that James narrative pictorial structure that I had been tracing all these years constitutes the figure in the carpet itself The pictorial pattern literally governs every line and chooses every word James brings the reader into the full consciousness of his character by taking us into the silent radiation of the visible As readers we experience the silence before language the silence between words and the silence after language In this book I will show my reader how the figure in the carpet operates as the controlling design in every square inch of text in each of James most famous novels and tales *Parliamentary Papers* Great Britain.
