Principles Of Data Security:

Principles of Data Security Ernst L. Leiss, 2012-12-06 With the greatly increased use of electronic media for processing and storing data data security became an important practical issue This is especially true for the extensively shared and distributed systems which are more and more being accepted in commercial operations Essentially the problem is that of protecting data including all the implications which this has to the end user as well as the systems or database designer However usually the term data security refers to protection by technical i e computer science specific means if one wants to include issues such as physical security how to select the group of people who should have authority to perform certain operations etc the term computer security is more appropriate The object of this book is to provide technical solutions to facets of the problem of achieving data security The reader who hopes to find clever recipes which allow circumventing protection mechanisms will however be sadly disappointed In fact we deliberately kept the presentation of the material at a fairly general level While the short term benefit of such an approach may be somewhat smaller we feel that without a thorough understanding of the fundamental issues and problems in data security there will never be secure systems True people probably always considered certain security aspects when designing a system However an integrated approach is absolutely imperative

Transparency and Proportionality in the Schengen Information System and Border Control Co-Operation Stephen Kabera Karanja, 2008 This volume offers an evaluation of the Schengen Information System and border control co operation from a transparency and proportionality perspective It also incorporates a legal descriptive analysis of the co operation in order to accommodate the changes and developments that occurred during the writing period The transparency and proportionality perspectives are developed from human rights and data protection criteria Transparency is understood as knowledge and accessibility to legal information as well as openness and accountability On the other hand proportionality is a requirement for guidance balance and justification as well as a need to avoid excessiveness and arbitrariness in border control work The final findings reveal that the Schengen co operation suffers from a deficiency of transparency and proportionality Consequently measures are proposed to augment the deficiency Even as this
