

PRINCIPLES FOR CREATING CLOTHING

By JESSIE WARDEN, Kansas State University;
MARTHA ANN GOLDING, Queens College,
City University of New York; and
JUDY STAM, Home Economist.

This concise text is invaluable for reviewing and reinforcing classroom work in clothing construction. The authors have recognized the many ways of working as well as the many fabrics and sewing adjuncts available to the modern sewer. To meet these problems and to avoid creating an encyclopedic and quickly outdated volume, they have concentrated on the basic principles of clothing: fit, comfort, appearance, and pleasure in wearing a garment of the sewer's own making—rather than whether or not she has used one of the "right" techniques in construction. In this way, the student's skill and judgment are emphasized rather than the techniques of sewing.

The material is organized so that the reader proceeds from background information to discussion of principles and decision-making applied to clothing construction. The book then takes the reader through the usual processes used in creating a garment, but not in step by step order. Instead techniques are discussed in relation to their function and use in the garment. The last section is on evaluation—trying to help the home sewer look at her garment in totality.

Golding and Stam are also the creators of *Clothing Construction: A Visual Approach*, an outstanding set of transparencies that can be used with any overhead projector. Available from Wiley.
