Modern Methods in High School Teaching Harl Roy Douglass,1926 This volume addresses teachers and principals presenting a comprehensive treatment of the methods of teaching in high schools The author assumes a familiarity on the part of his readers with the nature of the learning process adolescence and the psychological foundations of interests and motives as they relate to whole hearted pupil activity The fundamentals of both theory and practice are set forth and an attempt has been made to outline and describe the newer types of procedure which are being employed in different subjects in the best secondary schools Throughout the volume the attempt has been made clearly to represent practices rather than to advocate their adoption The reader is permitted to draw his own conclusions The book will appeal to the type of reader who wants to be intelligent about what is going on in high school teaching **Modern Mathematics** Dirk De Bock,2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math

from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends     **Supplementary Educational Monographs** ,1925     *Modern Methods in Topological Vector Spaces* Albert Wilansky,2013-11-26 Geared toward beginning graduate students of mathematics this text covers Banach space open mapping and closed graph theorems local convexity duality equicontinuity operators inductive limits and compactness and barrelled spaces 1978 edition     **Modern Methods of Lifelong Learning and Distance Education** Shaloo Sharma,2002     Textbooks in Large Type Printed to Order for Visually Impaired Students ,1974
