Re Engineering Female Friendly Science:

Re-engineering Female Friendly Science Sue Vilhauer Rosser, 1997 Sue Rosser's pioneering 1990 work *Female Friendly Science* introduced feminist teaching methods to maths and science education and gave us a six stage model for transforming curricula to attract and retain women in science engineering and mathematics programmes So successful was this new pedagogical paradigm that its reforms were assimilated into mainstream science education but ironically sacrificed their appeal to women in the process Now in this study Rosser revisits the feminist origins of curriculum transformation and puts the gender back in gender equity

[Understanding Girls](#) Dale Rose Baker, 2016-07-25 *Understanding Girls* Quantitative and Qualitative Research is a retrospective of the author's research that led to receiving the 2013 Distinguished Contributions Award to Science Education through Research This book includes selected articles that document changes in her research approaches and theoretical frameworks The articles represent the evolution of her thinking about the issue of girls in science as well as her impact on science education The author's work is placed in the context of science education research at the time of publication research in education and psychology and the culture of the times She pulls back the curtain that often makes the messy work of research seem straightforward and linear to reveal why she did the research and the methodological decisions she faced She describes the serendipitous nature of some of the work as well as her frustrations in trying to understand data and struggles to insure that she accurately and respectfully presented the voices of girls and their teachers The book also includes some of the earliest research in engineering education preceding the focus on engineering practices found in the Next Generation Science and Engineering Standards *Understanding Girls* provides insights into why girls may or may not decide to participate in science and engineering and what can be done to increase their participation It provides evidence that we have increased girls participation and the challenges that remain to insure that every girl who wants to become a scientist or engineer has the opportunity to do so

Women in Science and Engineering Cecily Cannan Selby, 1999 This volume comprises papers that assess whether where and how progress has taken place in the 25 years since the Academy held a conference entitled *Women in Science Determinants of Success* and recommend ways of accelerating it on the basis of research and the best practices to be found in corporate government and academic institutions The participants and

presenters come from large and small industries colleges and universities and government agencies they also represent a cross section of the scientific world ranging from student to Nobel laureate The shared perspective of the conference was that increased diversity must be aided and abetted through substantive changes in the attitudes policies and practices that inform how we educate and evaluate the workforce and how we manage the workplace [The Science Glass Ceiling](#) Sue V. Health Sue V. Rosser, 1997 This essay examines the ways in which health as a discipline has been influenced by feminist scholarship in the field It explains that feminist scientists in the field have recognized and sought to address gender bias in traditional approaches to health research including the androcentric bias in defining priorities for medical research the lack of funding for clinical research on women failure to recognize the effects of gender and interactions between gender ethnicity and class in research There is growing evidence to support the assertion that access to health care differs in accordance with gender race class and age and excessive focus on male research subjects and the definition of some diseases as male diseases has led to the underdiagnosis and undertreatment of these diseases in older women It also notes that the exclusion of women of color and lesbians and their health care needs from clinical research has often resulted in inadequate or inappropriate theories and conclusions being drawn from the data Contains 110 references MDM *Feminist Periodicals*, 1999 **Feminist Studies**, 1998 Northwest Anthropological Research Notes, 1999 **Book Review Index**, 2000 Every 3rd issue is a quarterly cumulation *Teaching Children Science* Joseph Abruscato, 2001 This truncated paperback volume is composed of strategies and techniques for teaching science derived from the fifth edition of Joseph Abruscato's successful text *Teaching Children Science A Discovery Approach* The first nine chapters of *Teaching Children Science* are included in this new title to provide students with a discovery approach to promote the teaching of the concepts skills and attitudes of science in the classroom These nine basic science teaching methods chapters cover strategies and techniques for teachers to incorporate cooperative learning questioning and active listening in their classrooms The author also covers planning and managing discovery based units assessing students learning and understanding the preparation of Internet based Science WebQuests and integrating science across the curriculum Handbook of Gender in Archaeology Sarah M.
