The 50 revised papers presented were carefully reviewed and selected for inclusion in the volume. The papers concentrate on the many aspects of information systems bridging the gap between research results in computer science and the many application fields. They are organized in the following topical sections: cross domain applications, aspects of modeling and validation, trust, security, privacy and safety, mobile applications, data processing and management, retrieval and complex query processing, e-commerce and papers from the colocated International Workshop on Security and Cognitive Informatics for Homeland Defense SeCIHD 2012.

Posthumanist Research and Writing as Agentic Acts of Inclusion Anne B. Reinertsen, Louise M. Thomas, 2023-12-01 Posthumanist Research and Writing as Agentic Acts of Inclusion Knowledge Forced Open looks at the true value and possibilities of learning and knowledge within the emerging field of New Public Governance by examining through a posthumanist lens and other perspectives the paradoxical knowledge situation we are in today. This book addresses the constitution of knowledge as an uncertain process, understanding text as spaces for entanglements of knowledge, knowledge not as certainty but as uncertainty and writing as the act and art of engaging with these entanglements. Through examining research from multiple perspectives, text stories as narrative are constructed as data showing ethnographic engagements between writers, readers and texts. The authors show how to construct messy entanglements of continual, always already constant thinking and becoming through the art and science of research and writing as knowledging processes. Suitable for scholars of posthumanist thinking in Education and the social sciences, this book challenges the academy to look at new ways of thinking with and through knowledge and showing the importance of such processes. **Restarting Stalled Research**
