Philosophical Papers Hilary Putnam, 1975 [Contemporary Perspectives in Philosophy and Methodology of Science](#) Wenceslao J. González, 2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place **Mathematics, Matter and Method** H. necessity conventionalism logical empiricism induction and falsification the sociology of science and realism Ideal for undergraduate students the book lays the necessary foundations for a complete and thorough understanding of this fascinating subject

Scientific Realism Stathis Psillos,2005-08-02 Scientific realism is the optimistic view that modern science is on the right track This book argues that the history of science does not undermine this notion suggesting it as the best philosophical account of science
