

The Reach and Grasp of Policy Analysis: Comparative Views of the Craft. By Richard L. Hofferbert. Tuscaloosa: University of Alabama Press, 1990. 192p.

Defining policy evaluation as the use of social science research to measure under what conditions public programs achieve their objectives (p. 4), Hofferbert draws

on his own academic policy research in developing countries to address the similarities and problems confronting this process.

Since the halcyon "social engineering" years of Lyndon Johnson's Great Society and examines the activity of policy research using cases with which Hofferbert is directly familiar. Chapters 2 and 3 provide useful examinations of extension research in land grant universities and practical challenges facing university researchers engaged in public program evaluation research. It is possible to derive from these chapters hypotheses that could be tested through surveys of university and other research centers. Part 2 examines the obstacles and opportunities confronting the export of U.S. policy analysis methods and epistemological assumptions to the analysis of developing countries. Generalizing from the analysis of previously published research.

Hofferbert argues that political scientists engaged in policy research engage in either product or process research. While the former focuses on policy performance and is useful to legislators who desire independent evaluations of evaluating agencies, the latter has greater long-term utility to program administrators. Moreover, process research also stands the best chance of endearing the discipline to policy analysis consumers, since it examines the relationship between the organization of authority as an independent variable and the accomplishment of policy objectives.

Hofferbert asserts that the "green years" of Great Society optimism minimized the long-term relevance of the work of policy analysis cloistered in universities and maximized their political vulnerability when social policies did not meet political expectations quickly or decisively enough. This has resulted in the institutionalization of policy analysis in places out of sight of many political scientists. Within state and local government institutes, agricultural extension centers, and similar places, however, policy research has flourished.

While there is much to warrant such an interpretation, rising overhead to sustain policy research in traditional academic departments, the collocating of some policy analysis fields (e.g., environment and energy) into multidisciplinary research centers, and the fact that the social problems being analyzed were larger than initially envisioned, as noted by observers such as John Schwarz in *America's Hidden Success*, (1988) may also have contributed to the apparent decline in support for social-science-based policy research.

Whether using firsthand experience in the evaluation of elderly services in New York state or applying contemporary policy analysis to evaluating Turkish economic development, the book is at its best when it sticks to its pragmatic theme—effective process analysis

resolution of tension between a disciplinary reward structure that often appears to penalize "practical" research.

Unfortunately, Hofferbert does not explore the phenomenonology of effective political science participation in policy research. As Hofferbert's cases illustrate, even university-based policy analysis is often conducted in interdisciplinary environments where project research agendas are established by several disciplines and methodologies and approaches are defended before committees unfamiliar with the idiosyncrasies of the researcher's discipline. Yet there is broad appreciation for the political variables responsible for policy success or failure. How are problems defined in such a context? How are research strategies developed to target these political variables in these environments effectively? This omission is ironic, since Hofferbert does explore the independence of political variables in successful policy implementation in developing countries with pluralistic political participation.

Other topics salient to the subject are also omitted, such as the rise of policy think tanks, both liberal and conservative, giving rise to rapid evaluations of existing public programs. The rise of these institutions may, in part, explain why, despite the decline in pure social science research dollars for studying social programs, the amount of policy analysis output (sometimes masquerading as objective scholarship) still arguably increases. One wishes that Hofferbert had generalized his analysis to permit a weighing of factors intrinsic to policy evaluation success, particularly in his discussion of extension research at land grant colleges where problem-oriented research has been conducted by social scientists in natural resource, economic development, and technology transfer policies. Taken as far as his cases permit, Hofferbert provides a good starting point for exploring these issues.

Race and the Decline of Class in American Politics. By Robert Huckfeldt and Carol Weitzel Kohfeldt Champagne-Urbana: University of Illinois Press, 1989. 205p. \$27.50

The central arguments of this book deserve close study by both political scientists and political strategists. In addition to an account of the rise of race and the decline of class and income distribution as fundamental organizing themes of U.S. electoral politics, the authors develop original approaches to these problems: how to secure the representation and fundamental rights of blacks and other minorities, blunt and alleviate racial polarization in the party system, secure more effective representation of class, and prevent the withering away of the Democratic party.

An unusual book, replete with mathematical models and computer simulations (many readers will have tough going there), it also offers many pragmatic suggestions for restructuring the system. The analysis incorporates historical accounts and well-documented quantitative data and is driven by a profound concern for the
