Birgit Griese presents MP2 Math Plus, a support project for first year students in engineering at Ruhr University Bochum that aims at preventing unnecessary drop out. Conceptualisation and development of the project follow a design research approach according to Gravemeijer, Cobb, and van den Akker. The interventions focus on learning strategies which are collected in a pre-post design with the aid of the LIST questionnaire by Wild and Schiefele. These and other data are utilised for the evaluation of MP2 Math Plus. The results confirm the adaptations of the project.
