Micro Management Science Microcomputer Applications Of Management Science:

Micro Management Science Sang M. Lee, Jung Shim, 1990 **Understanding Organizations and Management Through Triangle Analysis and Performance** James Shuler, 2006 There is a lack of understanding of how management within organizations make decisions and how these decisions are motivated based on the organization's structure. People within and outside of the organizational structure always want to understand how and why these decisions are made to better position themselves. The purpose of this book is to help the reader understand organizations and management, their structure and behavior, and the decisions that are made within. The new information that this book offers the readers is a simplified system for understanding the decision process at the various levels within the organization. This book introduces triangle analysis as a simple process that everyone can use to understand organizations, how they work, and how decisions are made.

Applications in Decision-aiding Software Stuart S. Nagel, 1992-06-18 Decision-aiding software is applied in this book to government, personal decisions, law, teaching, decision analysis, research, cross-national decision-making, business, and politics. *Using Performance Information to Facilitate Decisionmaking in Transportation Logistics* James Shuler, 2009-09-08 This book assesses whether and to what extent senior logistics executives use performance information when making logistics-related decisions. The research examines the performance management and measurement systems and processes within three major government organizations, determines what conditions, if any, affect logistics processes, and how the organizations measure them, and explores whether senior officials use this information in their decision-making. Case studies were conducted on the United States Department of Defense (DOD), the United States Postal Service (USPS), and the United States Department of Energy (DOE). Based on 12 critical practices that the United States General Accounting Office has identified for federal agencies to use in assessing compliance with the Government Performance and Results Act of 1993 (GPRA), 28 evaluation factors were used to assess the use of performance information at four logistical levels within each agency. *Micro Management Science* Sang M.
