Membrane Structures The Fifth Building Material:

Membrane Structures Klaus-Michael Koch, 2004 In this comprehensive work to date on membrane technology for architecture pioneers show how one of the world's oldest forms of building material is also its most innovative Today the cutting edge in architecture is not sharp but curved and undulating It is also impermeable to moisture resistant to extreme temperatures flexible and portable Known as the fifth building material after wood stone glass and metal membranes are popping up everywhere in Olympic stadiums in Berlin and Atlanta in airports from Denver to Bangkok over fashion shows formal gardens and soccer fields Membranes ability to not only let in but also reflect light portends enormous possibilities for harnessing energy This fascinating survey of membrane structures throughout the world discusses the history of the medium describes the materials and their uses explores the technology of membrane construction and investigates numerous current and future projects A final chapter offers a reasoned argument for further research and experimentation in this rapidly expanding field and a projection of its exciting future Illustrated throughout *Membranes for Structures* Josep Ignasi de Llorens, 2025-06-27 A growing use of membranes for construction purposes has recently been encouraged by their environmentally friendly characteristics To offer a timely and extensive research grounded compendium on structures made with fabrics and foils the most relevant facets of the state of the art are covered in two sister titles *Membranes for Structures Applications* is steeped in fascinating functional examples in fact a selection of detailed case studies is presented in Part One preceded by the description of two relevant historical antecedents which are the circus tent and the envelop The particular case of the successful spoked wheel structural system for the construction of large stadiums is the subject of Part Two including descriptions of four significant case studies Two growing fields of application are the focus of Part Three which is dedicated to facades that give buildings a unique appearance and Part Five which addresses replacements renovations and refurbishments activities that are frequently encountered in today's construction industry And Part Four presents the latest application developments in different countries across the globe with achievements in China Latin and North America Japan and Europe being highlighted The well amalgamated contributions authored by international experts produce a comprehensive reference to keep students and researchers as well as industry professionals and various other stakeholders abreast with the latest advancements Incorporates recent developments that are poorly documented in other literature available Describes functional structural and decorative applications of membranes in buildings and includes various relevant case studies from around the world Published alongside its sister title *Membranes for Structures Fundamentals* ISBN 9780443224072 *Biaxial Testing for Fabrics and Foils* Paolo Beccarelli, 2015-01-30 This book offers a well structured critical review of current design practice for tensioned membrane structures including a detailed analysis of the experimental data required and critical issues relating to the lack of a set of design codes and testing procedures The technical requirements for biaxial testing equipment are analyzed in detail and aspects that need to be considered when

developing biaxial testing procedures are emphasized The analysis is supported by the results of a round robin exercise comparing biaxial testing machines that involved four of the main research laboratories in the field The biaxial testing devices and procedures presently used in Europe are extensively discussed and information is provided on the design and implementation of a biaxial testing rig for architectural fabrics at Politecnico di Milano which represents a benchmark in the field The significance of the most recent developments in biaxial testing is also explored
