Resolution Methods for the Decision Problem C. Fermüller, 1993-07-29 This volume contains work on the decision problem done in Kazan Russia Tallinn Estonia and Vienna Austria The authors met several times to discuss and exchange their results and finally decided to write this monograph together Besides a unified treatment of previously published results there are many new results first presented in this volume The monograph opens with an introduction and a chapter on terminology followed by chapters on Semantic clash resolution as decision procedure Completeness of ordering refinements Semantic tree based resolution variants Deciding the class K by an ordering refinement A resolution based method for building finite models A final chapter on applications completes the volume *Theorem Proving with Analytic Tableaux and Related Methods* Peter Baumgartner, Reiner Hahnle, Joachim Posegga, 1995-04-26 This volume constitutes the proceedings of the 4th International Workshop on Theorem Proving with Analytic Tableaux and Related Methods TABLEAU 95 held at Schlo Rheinfels St Goar Germany in May 1995 Originally tableau calculi and their relatives were favored primarily as a pedagogical device because of their advantages at the presentation level The 23 full revised papers in this book bear witness that these methods have now gained fundamental importance in theorem proving particularly as competitors for resolution methods The book is organized in sections on extensions modal logic intuitionistic logic the connection method and model elimination non clausal proof procedures linear logic higher order logic and applications **Logic and Foundations of Mathematics** Andrea Cantini, Ettore Casari, Pierluigi Minari, 2013-03-09 The IOth International Congress of Logic Methodology and Philosophy of Science which took place in Florence in August 1995 offered a vivid and comprehensive picture of the present state of research in all directions of Logic and Philosophy of Science The final program counted 51 invited lectures and around 700 contributed papers distributed in 15 sections Following the tradition of previous LMPS meetings some authors whose papers aroused particular interest were invited to submit their works for publication in a collection of selected contributed papers Due to the large number of interesting contributions it was decided to split the collection into two distinct volumes one covering the areas of Logic Foundations of Mathematics and Computer Science the other focusing on the general Philosophy of Science and the Foundations of Physics As a leading choice criterion for the present volume we tried to combine papers containing relevant technical results in pure and applied logic with papers devoted to conceptual analyses deeply rooted in advanced present day research After all we believe this is part of the genuine spirit underlying the whole enterprise of LMPS studies Automated Reasoning Rajeev Gore, Alexander Leitsch, Tobias Nipkow, 2003-06-29 This book constitutes the refereed proceedings of the First International Joint Conference on Automated Reasoning IJCAR 2001 held in Siena Italy in June 2001 The 37 research papers and 19 system descriptions presented together with three invited contributions were carefully reviewed and selected from a total of 112 submissions The book offers topical sections on description modal and temporal logics saturation based theorem proving applications and data structures logic programming
