The profusion of his invention is spread over this vast area of over 900 square metres There are 343 principal figures of prodigious variety of expression many of colossal size and in addition a great number of subsidiary ones introduced for decorative effect The creator of this vast scheme was only thirty four when he began his work Michelangelo compels us to enlarge our conception of what is beautiful To the Greeks it was physical perfection but Michelangelo cared little for physical beauty except in a few instances such as his painting of Adam on the Sistine ceiling and his sculptures of the Piet Though a master of anatomy and of the laws of composition he dared to disregard both if it were necessary to express his concept to exaggerate the muscles of his figures and even put them in positions the human body could not naturally assume In his later painting The Last Judgment on the end wall of the Sistine he poured out his soul like a torrent Michelangelo was the first to make the human form express a variety of emotions In his hands emotion became an instrument upon which he played extracting themes and harmonies of infinite variety His figures carry our imagination far beyond the personal meaning of the names attached to them
