**Restructuring Schools, Reconstructing Teachers** Peter Woods, Bob Jeffrey, Geoff Troman, Mari Boyle, 2019-07-01

Drawing on wide ranging research this book originally published in 1997 explores how the policy changes of previous years were affecting primary teachers and their work at the time Within the context of worldwide restructuring the thoughts feelings and activities of teachers in their daily work are examined The core argument is that what used to be a complex but fulfilling job distinguished by professional dilemmas which are amenable to professional skill had become increasingly marked by tension and constraint which frustrates teacher creativity While some teachers found new opportunities in the new primary school many used strategical and micro political activity in order to cope while others fell victim to stress and burnout The authors argue that teachers own active involvement in policy change is required if their creative potential is to be realized The book will still be of interest to teachers in primary schools researchers and policy makers

**Resources in Education**, 1994 *Restructuring Schooling for Individual Students* William M. Bechtol, Juanita S. Sorenson, 1993 Current research in education reveals a system that consistently delivers disappointing results Recent

reforms developed in response to the Nation at Risk report have in many cases been so restrictive that they have actually aggravated the problem increasing retention and drop out rates and producing even more high school graduates who must take remedial courses in college. The authors of this timely book believe that one of the root causes of this educational decline is the failure of traditional methods and curricula to meet the needs of an increasingly diverse and multicultural school population. Their solution: Restructure public schools to accommodate the variety of student learning aptitudes present in today's classroom and give students a greater opportunity to be successful. In these pages you will find a number of ways to accomplish these goals. And you will discover a variety of innovative programs that are succeeding in public schools right now including programs from eight model schools across the country that show many of these ideas in action. Throughout the book the authors focus on options for restructuring that are practical and inexpensive to implement in any school system. They present detailed descriptions of classroom strategies and curriculum approaches that will be helpful to pre-service and in-service teachers and to administrators interested in the many restructuring options available. Specific strategies for effective teaching are discussed including the direct teach method, mastery learning, cooperative learning, the whole language approach to teaching reading and writing, and early intervention reading programs. The authors also present a complete learning how to learn curriculum that emphasizes process as well as content. Other important topics covered in depth include teaching and learning styles, management and motivation, parent-school-community partnerships, and staff development. A sample staff development sequence is included in Chapter 10.

Restructuring Schools W. Lowe Boyd, 2005-08-17 Education reform has become part of a political imperative in a number of developed countries around the world. The simultaneous movement to reform schooling and the administrative structures which deliver educational services therefore needs to be studied in order to lay bare its fundamental assumptions. This movement has been labelled restructuring and reform although the words carry different meanings in different countries. The authors question why this reconstruction occurred at the same time in different places. What common themes are emerging in the restructuring movement? And in the 1990s where will the movement lead schooling and what essential changes will it effect? They explore these questions by examining developments in the USA, Canada, the UK, Australia, New Zealand, and Japan.
