## **Rethinking Environmental Protection:**

**Rethinking Environmental Protection** Phillip F. Cramer, 2000-01-01 Despite widespread popular support for environmental action Phillip F Cramer argues that current U S environmental policy approaches fail to address the real threat of environmental insecurity Cramer traces this failure to a reluctance to recognize and address the interconnectedness of natural forces just as all elements within the environment are linked so too should our perspectives on and responses to environmental degradation be linked In this book Cramer provides an innovative holistic approach to environmental protection that incorporates the best lessons learned from the fields of biology ethics philosophy political science law ecology and international relations He especially advocates local action and providing illustrative examples demonstrates how local action around the world is most effective when carried out within a global framework that supports information dissemination and international coordination This book will energize to thought and action any scholar student or general reader concerned with environmental issues and our current trajectory toward environmental decay **Rethinking Environmental Protection for the Twenty-first Century** University of Chicago. Law School, 1997 **Rethinking Park Protection** Will La Page, 2012 In today s society hidden beliefs can subtly guide the management of parks such as treating them as natural resources rather than national assets Resulting management practices often lead to deferred maintenance on park infrastructure causing inadequate protection from vandalism poaching and theft of artefacts A sad demise often due to an out dated belief that parks are non essential leisure services rather than necessities for a vibrant modern life This book challenges the reader to examine the core beliefs that created our public parklands comparing them with the beliefs that guide contemporary park stewardship in an effort to improve the management of parks and reassess their purpose in modern life pub desc **Rethinking Environmental Law** Laitos, Jan G., 2021-08-27 Challenging historic assumptions about human relationships with nature Jan G Laitos examines how environmental laws have addressed environmental problems in the past and the reasons for the laws inability to successfully prevent environmental contamination and alterations of critical environmental systems This forward thinking book offers a creative and organic alternative to traditional but ultimately unsuccessful environmental rules It explains the need for a new generation of environmental laws grounded in the universal laws of nature which might succeed where past and current approaches have largely failed **Rethinking the American Environmental Movement post-1945** Ellen Spears, 2019-06-28 Rethinking the American Environmental Movement post 1945 turns a fresh interpretive lens on the past drawing on a wide range of new histories of environmental activism to analyze the actions of those who created the movement and those who tried to thwart them Concentrating on the decades since World War II environmental historian Ellen Griffith Spears explores environmentalism as a field of movements rooted in broader social justice activism Noting major legislative accomplishments strengths and contributions as well as the divisions within the ranks the book reveals how new scientific developments the nuclear threat and pollution as well as changes in

urban living spurred activism among diverse populations The book outlines the key precursors events participants and strategies of the environmental movement and contextualizes the story in the dramatic trajectory of U S history after World War II The result is a synthesis of American environmental politics that one reader called both ambitious in its scope and concise in its presentation This book provides a succinct overview of the American environmental movement and is the perfect introduction for students or scholars seeking to understand one of the largest social movements of the twentieth century up through the robust climate movement of today

**Rethinking Environmental Management in the Pacific Rim** Amrita Daniere, Lois. M Takahashi, 2017-11-22 This title was first published in 2002 Environmental degradation resulting from rapid industrialization has become a serious issue for the governments of Southeast Asia This volume focuses on three interrelated factors in environmental management in Bangkok and other rapidly developing urban areas along the Pacific Rim government policy and enforcement non governmental organization intervention and community participation

**Rethinking U.S. Environmental Protection Policy** Dennis A. Rondinelli, 2000 *The New Environmental Regulation* Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in *The New Environmental Regulation* that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses

*Rethinking the Materials We Use* Ken Geiser, Frances H. Irwin, 1993

**Stumbling Toward Sustainability** John C. Dernbach, 2002 In 1992 at the United Nations Conference on Environment and Development in Rio de Janeiro the nations of the world agreed to implement an ambitious

plan for ecologically sustainable human development This book is a comprehensive review of U S efforts to achieve such development since Rio The U S has unquestionably begun to take steps toward sustainable development Yet the nation is now far from being a sustainable society and in many respects is farther away than it was in 1992 Nevertheless legal and policy tools are available to put the U S on a direct path to sustainability This book brings together 42 distinguished experts from a variety of backgrounds and academic disciplines It is among the most thorough assessments ever conducted of U S law and policy concerning the environment

**E-Cycling: Linking Trade and Environmental Law in the EC and the U.S.** Harri Kalimo,2006-06-20 Provides insight into recycling legislation and its relationship with trade law explaining numerous environmental policy tools such as producer responsibility Examines the relationship between international trade and environmental protection Uses a case study of electronic recycling and a comparative law approach to clarify the evolving law of the European Community and the United States

**Rethinking Nature** Bruce V. Foltz,Robert Frodeman,2004 A landmark volume for defining the terrain of environmental philosophy Rethinking Nature brings the voices of leading Continental philosophers into discussion about what is emerging as one of our most pressing and timely concerns the environmental crisis facing our planet The essays featured in this volume embrace environmental philosophy in its broadest sense and include topics such as environmental ethics environmental aesthetics ontology theology gender and the environment and the role of science and technology in forming knowledge about our world Here philosophy goes out into the field and comes back with rich insights and new approaches to environmental problems

**Rethinking Tourism and Ecotourism** Deborah McLaren,1998 Deborah McLaren presents a comprehensive overview of the history and global development of tourism often considered the largest industry in the world today No study of the globalization of the world s economy and industry can afford to ignore the impact that tourism is having in an ever shrinking world where wealth is concentrated in fewer and fewer hands and within this important book the impact of tourism is thoroughly explored

Reclaiming the Land Gregg Macey,Jonathan Z. Cannon,2007-06-22 Marianne Horinko Executive Vice President Global Environment and Technology Foundation On August 7 1978 President Carter declared a state of emergency in the community of Love Canal New York The President urged residents of Love Canal to evacuate not because of a recent catastrophic event but because of something that occurred in the 1940 s and 1950 s This

Niagara Falls community had been developed on land that was formerly used as a landfill. Although the landfill was closed in 1953, it had been a dumping ground for tons of chemical wastes, and that waste would eventually create an environment extremely dangerous to human health. The image of chemicals seeping into the basements of American homes would produce widespread panic but would also raise the environmental consciousness of a nation and produce a legislative response that was equal to the task. Americans celebrated the first Earth Day in April 1970. Throughout the rest of the decade, we passed legislation intended to fulfill the promise of that day to create a clean and safe environment. However, there were still holes in our environmental protection in 1978, evidenced by the problems at Love Canal. In response, Congress passed the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), or as many people call it Superfund. Passed in 1980, this law was intended to address problems like the ones faced at Love Canal.
