Syntactic architecture and its consequences II András Bány, Theresa Biberauer, Jamie Douglas, Sten Vikner, 2020-12-30 This volume collects novel contributions to comparative generative linguistics that rethink existing approaches to an extensive range of phenomena domains and architectural questions in linguistic theory At the heart of the contributions is the tension between descriptive and explanatory adequacy which has long animated generative linguistics and which continues to grow thanks to the increasing amount and diversity of data available to us The chapters address research questions in comparative morphosyntax including the modelling of syntactic categories relative clauses and demonstrative systems Many of these contributions show the influence of research by Ian Roberts and collaborators and give the reader a sense of the lively nature of current discussion of topics in morphosyntax and morphosyntactic variation

Rethinking Restructuring, 2009 2009 was a very untypical year. Contrary to past economic cycles organizations are recognizing that while they need to take short term action on managing costs they also need to retain talent that will be required for recovery and growth. This e Presentation discusses how organizations can take a dual short term medium term approach to dealing with today's challenges. Ideas on optimizing pay clarifying performance incentives and improving talent development and succession while responding to short term cost management efforts are presented. Geographies of Economies Roger Lee, Jane Wills, 2014-05-01 Setting out to explore the intersections of economy and geography this book brings together contributions from the world's top economic geographers. Over forty contributors draw upon contemporary theory and experience to explore the cultural and social constitution of economic geographies processes of globalisation and new forms of political regulation and practice. Although focusing upon new economic geography the book also illustrates the many connections with previous scholarship as scholars seek to reconstruct the traditions of political economy to understand the contemporary world. Highlighting and illustrating contemporary developments the book opens up discussion about the implications of the complex geographies involved. In pointing to new directions of research and debate this major statement in state of the art economic geography demonstrates the central relevance of economic geography not only in understanding the trajectories of change but in proposing alternatives.

Scratching the Surface Enakshi Dua, Angela Robertson, 1999 *Scratching the Surface* brings together 14 anti racist feminists who examine ways in which race and gender interact to shape the lives of women of colour in Canada. This collection of articles covers a broad range of topics such as the impact of colonialism and its associated discourses on First Nations and other groups of colonized women racism in the Canadian labour movement the impact of globalization on women of colour the ways in which the institution of the nuclear family shapes racism sexism in communities of colour and the ways in which the women's movement can create an anti racist praxis. The book not only provides exciting new insights into how

women of colour experience Canadian society but also provides instructors with a textbook that integrates anti racist and feminist approaches *Rethinking Restructuring* Isabella Bakker,1996 During the past decade Canadian policy makers have been forced to re examine familiar forms of government and established programs in the face of growing budget deficits economic instability and a rapidly changing global economy This collection of eighteen original essays presents a critical exploration of the question of political and economic restructuring from the vantage point of gender The authors argue that the present shift in the global order is revealing the contradictory effects of what is a dual process of both gender erosion and intensification With the convergence of male and female job experiences in polarized labour markets gender appears to be less important in understanding the global political economy at the same time gender becomes more of a determining factor in the transformation of politics and markets owing to the changing role of women as workers care givers and consumers The decline of the Keynesian welfare state has made claims based politics less viable as a site of struggle for the women s movement Not only has claims based politics been replaced by a trend towards community and individual reliance the women s movement itself has undergone a transformation that precludes a unitary homogenous approach to policy and politics BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Book Review**
