Proceedings of the 9th International Conference on Indonesian Social and Political Enquiries (ICISPE 2024) Bangkit A. Wiryawan, Muhammad Faiq Adi Pratomo, Suyatno Ladiqi, 2025-08-01 This is an open access book The International Conference on Indonesian Social and Political Enquiries ICISPE is an annual event held by the Faculty of Social and Political Sciences at Universitas Diponegoro This year's ICISPE is held for the 9th time As with the previous years this international conference is built based on the spirit and passion of the development from multi discipline and inclusive sciences whilst promoting the advancement of research across the country Thus the conference not only gives a chance for the academics to assess phenomenon and contemporary problems by collaborating with various disciplines but also delivers opportunities as widely as possible to every stakeholder who is willing to bridge academic and practical fields ICISPE also offers to facilitate open discussions and debates transfer of knowledge strategies for policy formulation and networking amongst scholars and policymakers Later this multi discipline and inclusive collaboration are further implemented through discussion forums advanced research and or joint publication The theme of this year's ICISPE conference is Navigating challenges and limits to inclusive development in the Global South The post covid world has shown some economic and political turmoil that posed a potential threat to reaching the 2030 goal. One of which is the rising of hybrid regimes at the cost of democratic growth in many developing countries According to the latest V Dem Report Marina et al. 2024 more than 40 countries are in the state of autocratizing with deteriorating freedom of expression in 35 countries that are mostly in the Global South This could signify a great challenge in realizing the 2030 Agenda on inclusive and sustainable development

Decentralizing Governance G. Shabbir Cheema, Dennis A. Rondinelli, 2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic political and social conditions throughout the world Rather than the top down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century today's world demands flexibility adaptability and the autonomy to bring those qualities to bear In this thought provoking book the first in a new series on Innovations in Governance experts in government and public management trace the evolution and performance of decentralization concepts

from the transfer of authority within government to the sharing of power authority and responsibilities among broader governance institutions This movement is not limited to national government it also affects subnational governments NGOs private corporations and even civil associations The contributors assess the emerging concepts of decentralization e g devolution empowerment capacity building and democratic governance They detail the factors driving the movement including political changes such as the fall of the Iron Curtain and the ascendance of democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result

Public Sector Reforms in Developing Countries Charles Conteh,Ahmed Shafiqul Huque,2014-04-03 The underpinning assumption of public management in the developing world as a process of planned change is increasingly being recognized as unrealistic In reality the practice of development management is characterized by processes of mutual adjustment among individuals agencies and interest groups that can constrain behaviour as well as provide incentives for collaborative action Paradoxes inevitably emerge in policy network practice and design The ability to manage government departments and operations has become less important than the ability to navigate the complex world of interconnected policy implementation processes Public sector reform policies and programmes as a consequence are a study in the complexities of the institutional and environmental context in which these reforms are pursued Building on theory and practice this book argues that advancing the theoretical frontlines of development management research and practice can benefit from developing models based on innovation collaboration and governance The themes addressed in *Public Sector Reforms in Developing Countries* will enable public managers in developing countries cope in uncertain and turbulent environments as they seek optimal fits between their institutional goals and environmental contingencies

The Politics of Development in Morocco Sylvia I. Bergh,2017-01-30 Since the mid 1990s Morocco has sought to present itself as a model of genuine and gradual reform with decentralisation as a key tenet of this Here Sylvia Bergh investigates the dynamics of popular participation and local governance testing the extent to which the current structure builds local capacity or whether it is in fact a tool for soft state control She narrates the realities of local administration and civil society to shed critical light on questions of democratic transition in North Africa Her assessment of decentralisation and participatory development projects in rural Morocco and the legal and policy frameworks in which they operate leads to the conclusion that they have generally not yet led to an expansion of a civil society able to build local capacity or enhance bottom up empowerment Grounded in an approach of the anthropology of policy this book makes an important contribution to literature on the democratisation development and

and theoretical grounding as well as representative case studies of decentralization at the state and local levels The authors combine qualitative and quantitative data in their examination of the transfer of authority over fiscal human and physical resources in the health sector The result is a major contribution to the ongoing debate over the advantages and disadvantages of decentralization in varying political cultural and economic contexts Nuria Homedes is associate professor at the University of Texas School of Public Health Houston Antonio Ugalde is emeritus professor at the Department of Sociology University of Texas at Austin
