Pediatric Surgery Emmanuel A. Ameh, Stephen W. Bickler, Kokila Lakhoo, Benedict C. Nwomeh, Dan Poenaru, 2020-11-23 The second fully updated edition of this book applies and contextualizes up to date information on pediatric surgery for low and middle income countries LMICs. The book is organized in general anatomic and thematic sections within pediatric surgery such as urology oncology orthopedics and gastroenterology and includes chapters addressing the unique challenges and approaches for pediatric surgery in low resource settings. Each chapter has dual authorship LMIC author providing context specific insights and authors from high income countries HICs contributing experience from well resourced settings. Written in a reader friendly format this book has a uniform structure in each chapter with introduction demographics etiology pathophysiology clinical presentations investigations management outcome prevention ethics evidence based surgery and references. This comprehensive volume fills the gap between up to date pediatric surgical scholarship and knowledge developed and applied in HICs and the practical needs of practitioners in low resource settings. This is an indispensable guide for postgraduate surgical trainees in Africa and other LMICs as well as general surgeons practicing in Africa and other LMICs who need to care surgically for children.

Clinical Anatomy for Laparoscopic and Thoracoscopic Surgery Raghu Savalgi, Harold Ellis, 1996 The traditional view of clinical anatomy is of limited value to those having to adapt to the two dimensional video presentations encountered during laparoscopic and thoracoscopic surgery. This manual provides a comprehensive guide to the new anatomy for surgeons trainees and medical students.

Complications in Surgery Michael W. Mulholland, Gerard M. Doherty, 2006 This volume offers authoritative evidence based recommendations for preventing and managing complications in all current general surgery procedures. The opening sections discuss institutional risk management issues and risks common to all operations such as wound healing problems infection shock and complications in immunosuppressed patients. Subsequent sections focus on complications of specific procedures in thoracic vascular gastric endocrine breast and oncologic surgery as well as organ transplantation and pediatric surgery. For each procedure the authors discuss surgical goals expected outcomes preoperative identification of risk factors intraoperative technique and postoperative risk. Numerous decision making algorithms drawings of techniques and tables complement the text.

Principles and Practice of Surgical Laparoscopy Simon Paterson-Brown, James Garden, 1994 This book critically evaluates each laparoscopic procedure versus its corresponding open operation. For each condition

leading surgical experts provide comparative reviews of current surgical practice including brief description of technique advantages complications expectations and most importantly results
