It’s similar to traditional programming in the sense that predefined guidelines drive the process, however it’s more advanced as it permits *inference* and *adaptation* to new situations.

1.2 What is Machine Learning?

Machine Learning, or ML, focuses on the creation of systems or models that can learn from data and improve their performance in specific tasks, without the need to be explicitly programmed, making them learn from past experiences or examples to make decisions on new data. This differs from traditional programming, where human programmers write rules in code, transforming the input data into desired results.
