

# THE MOLECULE HUNT

How Archaeologists are  
Bringing the Past Back to Life

This well-illustrated, step-by-step guide to the use of molecular biology in archaeology is the first book to show how the latest techniques are being used to bring the past back to life. It covers the use of DNA, proteins, and other molecules to identify ancient organisms and to trace their evolution. It also discusses the use of molecular biology to study ancient human populations and to trace the spread of diseases.
