Symbolic Control and Identity addresses the central issue of Bernstein's research project: are there any general principles underlying the transformation of knowledge into pedagogic communication? In Bernstein's view, we have studied only pedagogic messages and their institutional and ideological base. We have not studied the nature of the relay which makes messages possible. The discussion of this research forms part II of this book, where Bernstein makes explicit the methodology of the research and in particular the crucial significance of languages of description. This new edition of Bernstein's classic book is updated with three new chapters on discourse on official knowledge and identities and a wide-ranging interview with Joseph Solomon. The new edition, published as Volume Five in his *Class Codes and Control* Series, builds on the continuing tradition of Bernstein's highly influential work on class, education, language, and society.

Sociological Thinking in Music Education Carol Frierson-Campbell, Clare Hall, Sean Robert Powell, Guillermo Rosabal-Coto, 2022-01-14. *Sociological Thinking in Music Education* presents new ideas about music teaching and learning as important social, political, economic, ecological, and cultural ways of being, with an overarching aim to move beyond mere descriptions of what is, by analyzing how social inequalities and inequities, conflict, and control and power can be understood in and through music teaching and learning at both individual and collective levels.

Genre Changes and Privileged Pedagogic Identity in Teaching Contest Discourse Ning Liu, Derek Irwin, 2017-01-20. This book analyzes how the English as a Second Language (ESL) pedagogic genre has been re-contextualized in the Shanghai Foreign Language Education Press National College English Teaching Contest (SFLEP) for presentation to the contest judges and audience. Departing from prior research on contest discourse, it focuses on the role of teaching contests in re-contextualizing educational practices. Moreover, it addresses the processes of genre blurring and solidification at work in new discourse events. The results presented here serve to frame teaching contest discourse in a fuller contextual configuration and will help contest sponsors, participants, and audience members better understand this popular social event and its relations to real-world teaching practices, while simultaneously helping teachers to understand the relevance of such contest practice. Moreover, the research methods will benefit those linguists who are interested in researching other types of event discourses.

War and Its Ideologies Annabelle Lukin, 2018-10-09. Ideology is so powerful it makes us believe that war is rational despite both its brutal means and its devastating ends. The power of ideology comes from its intimate relation to language; ideology recruits all semiotic modalities but language is its engine room. Drawing on Halliday's linguistic theory, in particular his account of the semiotic big bang, this book explains the latent semiotic machinery of language on which ideology depends. The book illustrates the ideological power of language through a study of perhaps the most significant and consequential of our ideologies: those that enable us to legitimate, celebrate, even venerate war at the same time that we abhor, denounce, and proscribe violence. To do so, it makes use of large multi-register corpora, including the British National Corpus and the reporting of the 2003 invasion of Iraq by Australian, US, European, and Asian news sources. Combining detailed text analysis with corpus linguistic methods, it provides an empirical analysis showing

the astonishing reach of our ideologies of war and their profoundly covert and coercive power **Knowledge and Identity**

Gabrielle Ivinson, Brian Davies, John Fitz, 2010-11-23 What in the digital era is knowledge Who has knowledge and whose knowledge has value Drawing on aspects of Bernstein's work that have attracted an international following for many years the international contributors to this book raise questions about knowledge production and subjectivity in times dominated by market forces privatisation and new forms of state regulation Meritocracy, Citizenship and Education John

Beck, 2008-05-20 This monograph celebrates the 50th anniversary of Michael Young's iconic book *The Rise of the Meritocracy* by analysing the ideas behind meritocracy citizenship and education Within the context of Young's ideologies and influences on education the support for meritocracy under New Labour in the UK is examined The book then goes on to examine New Labour's idea of active citizenship The aim is to go beyond exposition to develop a sustained critique particularly of New Labour's over-centralising tendencies and the associated erosion of local and institutional democracy
