suggests that there is much to gain from reading the risk society from a diachronic literary cultural perspective Tracing changes and continuities the fictional case studies reveal the human preoccupation with safety and control of the future They show the struggle with uncertainties and the construction of individual or collective logics of risk which oscillate between rational calculation and emotion helplessness and denial and an enabling or destructive sense of adventure and danger Advancing the study of risk in fiction beyond the confinement to dystopian disaster narratives this book shows how topical notions such as chance and probability uncertainty and responsibility fears of decline and transgression all cluster around risk
