Macro And Micro Data Analysis And Their Integration:

Macro- and Microdata Analyses and Their Integration Nancy D. Ruggles, Richard Ruggles, 1999 These essays represent pioneering work by Nancy and Richard Ruggles on both the integration of micro and macro accounting data and the development of microdata which have wide ranging implications for modern theories of savings and investment *National Accounting and Economic Policy* Nancy D. Ruggles, Richard Ruggles, 1999-01-01 Richard Ruggles often assisted by Nancy Ruggles has been a major contributor to national income accounting and to the empirical study of microeconomics and macroeconomics using that and other data He has focused on the quantitative analysis of actual economic systems in a discipline increasingly preoccupied with abstract pure conceptual models Like the work of Simon Kuznets and others Ruggles s analyses encompass an unusually wide range of variables Warren J Samuels Michigan State University US This volume reflects the pioneering contribution of Nancy and Richard Ruggles to the development of national accounts It provides a comprehensive overview of the evolution of national accounting systems over the last 50 years The New Generation of Computable General Equilibrium Models Federico Perali, Pasquale Lucio Scandizzo, 2018-05-02 This book covers some important topics in the construction of computable general equilibrium CGE models and examines use of these models for the analysis of economic policies their properties and their implications Readers will find explanation and discussion of the theoretical structure and practical application of several model typologies including dynamic stochastic micro macro and simulation models as well as different closure rules and policy experiments The presentation of applications to various country and problem specific case studies serves to provide an informed and clearly articulated summary of the state of the art and the most important methodological advancements in the field of policy modeling within the framework of general equilibrium analysis The book is an outcome of a recent workshop of the Italian Development Economists Association attended by a group of leading practitioners involved in the generation of CGE models and research on modeling the economy and policy making It will be of interest to researchers professional economists graduate students and knowledgeable policy makers *The Sociology of Social Work* Martin Davies, 2023-07-21 How do sociologists explain the role and function of social work in society How has sociological knowledge been used adapted and misused by social workers Originally published in 1991 The Sociology of Social Work includes chapters on sociological theory and social work child protection community care probation interviews family therapy residential care race and knowledge and power

Assessing Urban Transportation with Big Data Analysis Dongyuan Yang, Zhengyu Duan, 2022-09-19 This book chiefly focuses on urban traffic an area supported by massive amounts of data The application of big data to urban traffic provides strategic and technical methods for the multi directional and in depth observation of complex adaptive systems thus transforming conventional urban traffic planning and management methods Sharing valuable insights into how big data can be applied to urban traffic it offers a valuable asset for information technicians traffic engineers and traffic data analysts

alike *Statistical Journal of the United Nations Economic Commission for Europe*, 1985 **The New System of National Accounts** John W. Kendrick, 2012-12-06 National income estimates date back to the late 17th century but only in the half century since the Second World War have economic accounts developed in their present form becoming an indispensable tool for macroeconomic analysis projections and policy formulation Furthermore it was in this period that the United Nations issued several versions of a system of national accounts SNA to make possible economic comparisons on a consistent basis The latest version SNA 1993 published in early 1994 occasioned this collection of essays and commentaries The three chief objectives of the volume are to enhance understanding of socioeconomic accounts generally and of SNA 1993 in particular to offer a critique of SNA 1993 including constructive suggestions for future revisions of the system making it even more useful for its national and international purposes and to serve as a textbook or book of readings in conjunction with SNA 1993 for courses in economic accounts **Handbook of Computable General Equilibrium Modeling** Peter B. Dixon, Dale Jorgenson, 2013-10-25 In this collection of 16 articles top scholars synthesize and analyze scholarship on this widely used tool of policy analysis setting forth its accomplishments difficulties and means of implementation Though CGE modeling does not play a prominent role in top US graduate schools it is employed universally in the development of economic policy This collection is particularly important because it presents a history of modeling applications and examines competing points of view Presents coherent summaries of CGE theories that inform major model types Covers the construction of CGE databases model solving and computer assisted interpretation of results Shows how CGE modeling has made a contribution to economic policy **Quantity and Quality in Social Research** Alan Bryman, 2003-09-01 This book focuses upon the debate about quantitative and qualitative research which took root in the 1960s although many of the central themes go back centuries The basic terms of the debate have been felt in many of the disciplines which make up the social sciences especially sociology social psychology education research organization studies and evaluation research Filling the learning gap in program implementation using participatory monitoring and evaluation Elias Zerfu, Sindu W. Kebede, 2013-03-29 This study is motivated by the idea that even though participatory monitoring and evaluation PM E is widely accepted as a tool to manage development programs to be effective its application is widely constrained by its high start up resource requirements in terms of both finance and time However this paper argues that after the initial investment is made the payback from using PM E is much higher both in terms of grassroots level learning empowerment and capacity building and in terms of higher level strategic decision making which enhances impact This is demonstrated using field level experience of implementing PM E in farmer field schools FFSs under the Agricultural Services Support Program and Agricultural Sector Development Program Livestock ASSP ASDP L program in Zanzibar Tanzania After describing the major steps followed in designing and implementing a PM E for FFSs the major lessons learned and challenges faced in the process are discussed The study found out that PM E has enabled the tracking of technology uptake and reasons behind adoption and nonadoption of technologies

through detailed data collection This informed and improved decision making at a higher level to design feasible methods to scale up adoption at other FFSs and to devise solutions for nonadoption The need for incentives to undertake PM E was found to be one of the major challenges of implementation among others

Concepts and Methods for Integrating Social and Economic Statistics on Health, Education and Housing Christopher Thomas Saunders, United Nations. Statistical Office, 1986 This report is one of a series of technical reports issued by the United Nations on integration and improvement of social demographic and related statistics and indicators It notes that establishing detailed links between national accounts and balances and social statistics has proven to be unusually complex at the conceptual level The applicability and usefulness in the social fields of internationally recommended concepts and classifications from economic statistics are explored and the application of such concepts and classifications is discussed Chapters I through IV deal with general questions of integrating economic and social statistics that are common to many fields of social concern These include 1 the general justification for integration 2 the central importance of multipurpose classifications 3 problems and possibilities for linkage between micro and macro data and 4 technical issues involved in the use of statistics in social fields related to economic measurement Chapters V through VII analyze practical problems of integration using actual available data as illustrations in the fields of health services educational services and housing and human settlements Proposals for further work are summarized in Chapter VIII Contains five tables SLD

The Impact of Oportunidades on Human Capital and Income Distribution Dario Debowicz, Jennifer Golan, 2013-04-05 In an effort to inform social policy in Mexico this paper analyzes the effects of a major social program on school attendance and household income distribution accounting for its partial and general equilibrium effects Linking a microeconomic simulation model and a general equilibrium model in a bidirectional way the paper explicitly takes spillover effects of the Oportunidades conditional cash transfer program into account Our results suggest that partial equilibrium analysis alone may underestimate the distributional effects of the program Extending the coverage of the program leads to a significant increase in school attendance which reduces labor supply and increases the equilibrium wages of the children who remain at work This general equilibrium effect indirectly reduces income inequality and poverty at the national level

Contingency Theory Gary Itzkowitz, 1996-09-30 A major task for social theory in the 1990s is to explain the relationship between individuals and social structures This book makes two simple suggestions for forging a micro macro link The concept of contingency is a breakthrough for social theory Where current micro macro debates are merely an expanded but veiled regurgitation of philosophical issues debated long ago the concept of contingency allows social theory to transcend old paradigms and explain contemporary society

Proceedings of the 1984 Custom Integrated Circuits Conference, Genesee Plaza/Holiday Inn, Rochester, NY, May 21-23, 1984, 1984

The Social Dimensions of Adjustment Integrated Survey Ghislaine Delaine, 1992 This is one of a series of technical documents providing guidelines on the measurement and analysis of the socio economic effects of structural

adjustment policies and in particular how such policies affect living standards at the household level This document describes the main elements of the national information system needed to effectively provide the information used to undertake the full range of analysis proposed in the Analysis Plan It reviews the objectives of the Integrated Survey IS and includes a brief description of the analysis plans as well as a review of the other uses to which the IS data can be applied such as the computation of weights for consumer price indices A presentation of the prototype questionnaire and the rationale for the structure of the questionnaire and the reasons for including the various sections and questions is provided It reviews issues related to survey organization and field logistics with special emphasis on organizing survey operations in such a way that delays in survey implementation are reduced and that adequate checks are built in to control the levels of non sampling error that can so easily threaten the success of such a survey The document describes the steps of computing the essential household income and expenditure aggregates and subaggregates needed to develop household accounts Finally issues related to the presentation of the initial survey results are discussed
