Readings In Biomedical Ethics A Canadian Focus:

Readings in Biomedical Ethics Eike-Henner W. Kluge, 1998
Kluge, 2013-04-01

Biomedical Ethics Johnna Fisher, 2013
Biomedical Ethics A Canadian Focus second edition is an anthology of classic and contemporary readings designed to introduce students to the main debates and issues faced by practitioners in the medical professions The book is organized into nine chapters Each chapter includes an introduction followed by a selection of articles many of which explore ethical issues specific to the Canadian health care system The readings are supported by end of chapter case studies covering the issues highlighted in the articles study questions suggested further readings and an appendix illustrating how to provide case commentary on an ethical issue

Bioethics in Canada, Third Edition Carol Collier, Rachel Haliburton, 2021-03-25
Now in its third edition Bioethics in Canada A Philosophical Introduction offers a comprehensive overview of the philosophical historical and medical concepts shaping contemporary debates on biomedical issues The text opens with an introduction to moral theory and bioethical principles followed by application of these theories and principles to real world ethical conflicts involving abortion distributive justice genetics reproductive technology and other vital topics A landmark case opens each chapter illuminating the many issues involved in these debates as well as the philosophical assumptions that shape them Thoroughly updated to reflect recent political medical and cultural changes this third edition features new sections on Medical Assistance in Dying MAiD the moral philosophy of liberalism in bioethics the Mad movement CRISPR and gene editing and expanded content on mental health rural and remote communities and codes of conduct and codes of ethics Accessibly written with newly added case studies in the health care workplace this text is an insightful resource for courses in the disciplines of philosophy health studies medicine and nursing providing a strong ethical foundation in an ever changing field

A Cross-Cultural Dialogue on Health Care Ethics Harold Coward, Pinit Ratanakul, 2006-01-01
The ethical theories employed in health care today assume in the main a modern Western philosophical framework Yet the diversity of cultural and religious assumptions regarding human nature health and illness life and death and the status of the individual suggest that a cross cultural study of health care ethics is needed A Cross Cultural Dialogue on Health Care Ethics provides this study It shows that ethical questions can be resolved by examining the ethical principles present in each culture critically assessing each value and identifying common values found within all traditions It encourages the development of global awareness and sensitivity to and respect for the diversity of peoples and their values and will advance understanding as well as help to foster a greater balance and a fuller truth in consideration of the human condition and what makes for health and wholeness

Human, Social, and Organizational Aspects of Health Information Systems Kushniruk, Andre W., Borycki, Elizabeth M., 2008-04-30
Human Social and Organizational Aspects of Health Information Systems offers an evidence based management approach to issues associated with the human and social aspects of designing developing implementing and maintaining health information

systems across a healthcare organization specific to an individual team organizational system and international perspective Integrating knowledge from multiple levels this book will benefit scholars and practitioners from the medical information health service management information technology arenas *Genetic Engineering* Paul Flaman,2002 An overview of the main ethical issues regarding the genetic engineering of plants animals and human beings in the light of Christian values and Catholic teaching Toward a Moral Horizon Patricia Rodney,Janet L. Storch,Rosalie Catherine Starzomski,2004 A Canadian nursing ethics book written specifically for study at an advanced level Back cover Canadian Books in Print ,2001 *LES Nouvelles* ,1997 **American Journal of Health Behavior** ,1998 **Should Parents be Licensed?** Peg Tittle,2004 Presenting a debate on the need for a national parenting policy this volume asks whether the time is approaching for parents to be formally educated even licensed before they can take on the responsibilities of child care Crítica ,2001

The Future of the Disabled in Liberal Society Hans S. Reinders,2000 The Future of the Disabled in Liberal Society questions developments in human genetic research from the perspective of persons with mental disabilities and their families Hans S Reinders argues that when we use terms such as disease and defect to describe conditions that genetic engineering might well eliminate we may also be assuming that disabled lives are deplorable and horrific Reinders points out that the possibility of preventing disabled lives is at odds with our commitment to the full inclusion of disabled citizens in society The tension between these different perspectives is of concern to all of us as genetic testing procedures proliferate Reinders warns that preventative uses of human genetics might even become a threat to the social security and welfare benefits that help support disabled persons and their families Reinders also argues that this conflict cannot be resolved or controlled on the level of public morality Because a liberal society makes a commitment to individual freedom and choice its members can consider the diagnostic and therapeutic uses of human genetics as options available to individual citizens A liberal society will defend reproductive freedom as a matter of principle Citizens may select their offspring in accord with their own personal values Reinders concludes that the future of the mentally disabled in liberal society will depend on the strength of our moral convictions about the value of human life rather than on the protective force of liberal morality One of the most important aspects of this book is Reinder s attention to parents who have come to see the task of raising a disabled child as an enriching experience These are people who change their conceptions of success and control and therefore their conceptions of themselves They come to value their disabled children for what they have to give Even though disabled children and disabled adults present parents and society with real challenges the rewards are just as real This powerful critique of contemporary bioethics is sure to become required reading for those interested in human development special education ethics philosophy and theology **Immunization** Catherine Diodati,1999 New Titles in Bioethics ,1994

Biomedical Ethics in a Canadian Context Eike-Henner W. Kluge,1992 **Contemporary Readings in Biomedical Ethics** Walter Glannon,2001 This anthology of 42 readings begins with the author s thorough introduction to the history and

theories of biomedical ethics The readings that follow include the physician patient relationship reproductive rights and technologies genetics as well as death and dying *Die Philosophin* ,2002 **Encyclopedia of Bioethics** Stephen Garrard Post,2003
