Environmental Security Rita Floyd,Richard A. Matthew,2013 Economic development population growth and poor resource management have combined to alter the planet s natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the

book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity It is invaluable for both students and practitioners interested in international relations environment studies and human geography **Choice** ,1995 **Taken for Granted?** Olav Isachsen,2000 **Ohio State Journal on Dispute Resolution** ,2009 Bibliographic Index ,1995 **Current Literature on Science of Science** ,1996 *Institutional Interaction in Global Environmental Governance* Sebastian Oberthür,Thomas Gehring,2006 The first large scale systematic investigation of how interaction among international institutions affects global environmental governance with a conceptual framework and ten case studies *Books in Print* ,1991 *Knowledge and Environmental Policy* William Ascher,Toddi A.
