between these two methods If a cord attached to a shaft as in Fig 1 a be slipped downward until free from the feather and then the ends drawn a knot will result but if we draw the ends of the cord in the form shown in Fig 8 the loop disappears and there is no knot A few words may be said regarding artificially colored feathers in the work of the South American Indians I have never been able to detect a single instance of their use among the ancient Peruvians and the custom would seem to be confined at the present day to a few localities Two ornaments have been described consisting of feathers stained red and purple by aniline dyes These were used by the Aymar Indians in the vicinity of La Paz Bolivia who have lived many years in close contact with the white man and have become well acquainted with his cheap dyes The use of these dyed feathers which have a particularly garish and unnatural appearance is I believe one evidence of the decadence which seems inevitable to Indians in their situation Primitive man even in his combinations of most brilliantly colored feathers seldom produces effects that offend the artistic eye P 17 *The Technique of Surgical Gynecology* Augustin H.
