Reproduction Of Eukaryotic Cells:

Reproduction of Eukaryotic Cells David M. Prescott, 2012-12-02 *Reproduction of Eukaryotic Cells* organizes in a single source the principal facts and observations on the cell life cycle and reproduction of eukaryotic cells. The aim is to increase the overall understanding of how these cells reproduce themselves and how this reproduction is regulated. The book begins with a discussion of the sections of the cell cycle and regulation of cell reproduction. Separate chapters on cell growth, cell synchrony, the G1 period, S period, and G2 period follow. Subsequent chapters are devoted to activities during cell division, cell cycle changes in surface morphology, the role of cyclic AMP (cAMP) and cyclic GMP (cGMP) in regulation of cell reproduction, and changes in nuclear proteins, RNA synthesis, and enzyme activities during the cell cycle. The final chapter covers the genetic analysis of the cell cycle.
