Campbell,2016-03-16 Between the Crimean War and the end of the First World War the British Army underwent a dramatic change from being an anachronistic and frequently ineffective organization to being perhaps the most professional and highly trained army in the world Historians have tended to view that transformation through the successive political reform efforts of those years but have largely overlooked the ways in which the Army transformed itself from within This change was effected through the modernization of training operational and leadership doctrines The adoption of formal physical training and organized games played a central part in this process With its origins in elite public schools and upper class country homes the Army s philosophy of Athleticism was a part of the ethos of muscular Christianity widely held in contemporary British institutions Under the potent influence of this philosophy military sport went from a means of keeping soldiers from drink and the officers from duty to an institutionalized form of combat training This book documents the origins

and development of formal physical training in the late Victorian Army and the ways in which the Army's gymnastic training evolved into a vital building block of the process of turning a civilian into a fighting man. It also assesses the nature and extent of British military sport, particularly regimental sports, during this period of evolution for the Army. Through an investigation of the Army's physical culture during this dynamic period, one can gain an understanding of not only how the Army's change from within occurred but also of some of the important links between the Army and its parent society.

*Postfeminism in China* Jia Guo, 2026-02-03. Situated within feminist media and cultural studies, this book examines the everyday aesthetic labour of young middle-class Chinese women and their related social media practices. It also critically contextualises postfeminism within China's paradoxically neoliberal society. Drawing upon in-depth interviews with young middle-class women in China's first-tier cities, the book offers a nuanced feminist understanding of young women's femininities, identities, and subjectivities in contemporary digital China. By analysing the self-making and self-fashioning practices of these women, it contributes critical perspectives to the popular yet contested concept of postfeminism within feminist scholarship. Readers will encounter vivid accounts of young Chinese women's everyday social media experiences, exploring how they navigate beauty cultures and negotiate shifting gender-class norms in urban Chinese society. Furthermore, this book provides valuable insights into the scholarly concept of postfeminism in the unique context of China, shedding light on transnational gendered cultures in today's social media age. Tailored for scholars and students in gender and cultural studies, media studies, and China studies, the book proves especially beneficial for those interested in burgeoning feminist and gender-related research topics in the transnational context of digital China. It also appeals to a broader readership intrigued by digital culture, gender dynamics, and notions of beauty in contemporary Chinese society.
