Making Of Telecommunications Policy:

The Making of Telecommunications Policy Dick Olufs, 1999 The Making of Telecommunications Policy examines the history politics and impact of telecommunications policy Beginning with a comparison of several alternate views of the future Olufs explains how government action makes the widespread use of some new technologies more likely than others He details the challenges that rapid advances in communications technologies pose for policymaking institutions and considers the ways that government responds to the ideological economic and political interests of industry private advocacy groups and individuals Olufs discussed the recent trend toward deregulation and provides a full analysis of the Telecommunications Act of 1996 including the politics of its enactment and its long term implications for both industry and the daily lives of citizens

The Making of Telecommunications Policy Dick W. Olufs III, 2022 Olufs examines the history politics and impact of telecommunications policy *Telecommunications Policy-making in the European Union* Joseph W. Goodman, 2006-01-01 This book offers a good study of the development of telecommunications policy by the EU Great value to those interested in understanding both European telecommunications policy and more generally in how policy making operates in the EU Mark Thatcher West European Politics the book provides an interesting perspective on the evolution of nature of telecommunications policy making within the EU As a consequence the book should be of interest to telecommunications and politics government researchers alike Jason Whalley Communications Booknotes Quarterly This well written book deals with the emergence and shaping of telecommunications policy in Europe with a particular focus on the time period of 1987 1998 This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way without falling into the trap of admiring critical personalities and key actors The author has written an important and useful book which invites the research community to further explore the evolution of European telecommunications policy Erik Bohlin Communications Strategies Examining the emergence of a European Union telecommunications policy Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others He provides a history of the key actors in the policy making process from the first attempts by the national postal telegraph and telecommunication administrations to coordinate their telecommunications policies in the 1950s to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003 The analytical framework employed by the author draws upon new institutionalism and actor based approaches providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy making The focus of his analysis is on the European Commission s two pronged strategy of liberalisation and harmonisation which began in the late 1980s and culminated in an important milestone on January 1st 1998 when the EU Member States fully opened their telecommunications markets to

competition He concludes that a synthetic approach which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis is useful even necessary in understanding and explaining the many dimensions of EU policy making This authoritative study will be of interest to all those in the telecommunications industry including attorneys consultants and lobbyists who would like to know how the EU s policy developed It will appeal more generally to political scientists and scholars of European history and politics *Telecommunication Policy Act* United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and Finance,1990 **Media and Communications Policy Making** Robert G. Picard,2020-03-25 This textbook focuses on how media and communications policy is made and what influences its design It explores the structures and processes in which policymaking takes place worldwide the factors that determine its forms influence its elements and affect its outcomes It explores how to analyze policy proposals evaluate policy and use policy studies approaches to examine policy and policymaking Truly international in scope it lays out the variety of political social economic and institutional influences on policy the roles of industries and policy advocates in the processes and issues and factors that complicate effective policymaking and skew policy outcomes This textbook is a valuable resource for advanced undergraduate and postgraduate students [Making Universal Service Policy](#) Barbara A. Cherry,Steven S. Wildman,Allen S. Hammond, IV,Allen S. Hammond,1999-08-01 This book is the outgrowth of shared interests between the editors and the contributing authors to provide a multidisciplinary perspective in evaluating universal service policy and recommending policy changes to accommodate a more competitive telecommunications environment The book is interdisciplinary in nature to reflect the extremely complex context in which universal service policy is formed The chapter authors represent a broad cross section of disciplinary training professional positions and relationships in the telecommunications industry Academic disciplines represented include law economics anthropology communication and business This book s purpose is to significantly enhance the development of effective telecommunications universal service policy among policymakers industry members and stakeholders in the United States Universal service policy has been and will continue to be both enabled and constrained by the simultaneous interaction of social political technological and economic forces in the environment in which it is formed A more effective process for policy design is to seek agreement on how entitlements embedded in universal service policy should be modified as circumstances invariably change over time Therefore the volume reflects recent significant developments in U S universal service policy the implementation of which continues to unfold **Chinese Telecommunications Policy** Xu Yan,Douglas C. Pitt,2002 Based on firsthand information obtained from interviews with senior figures in the Chinese telecommunications industry this book presents a unique review and analysis of the evolution of Chinese telecommunications policy It analyses the strengths weaknesses opportunities and threats facing new entrants issues of ownership and interconnection the broad economic background of 3G licensing and the significant implications of China s accession to the WTO These are fully analyzed within

the context of the unfolding Chinese regulatory system

The Making of Energy and Telecommunications Policy Georgia Persons, 1995-02-22 This is a study of how policy ideas first raised as definitions of specific problems and as solutions for those problems get translated into formal public policy Specifically the work tracks the making of energy and telecommunications policy taking the reader inside the legislative policy debate involving elected officials administrators industry representatives lobbyists and citizen representatives The author analyzes the many legislative proposals representing the preferences of the various participants which over the course of the seven year policy cycle seen here illustrate the process of synthesis and analysis which underlies congressional policy making today *Section 706 of the Telecommunications Act of 1996 and Related Bandwidth Issues* United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications, 1999

Network World, 1988-04-04 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce

[Foundations of Communications Policy](#) Philip M. Napoli, 2001 Rapid changes in communication technologies are straining the existing system of electronic media regulation Despite the increasing pace of technological change the electronic media continue to be regulated under a well established set of guiding principles Principles such as the First Amendment the public interest the marketplace of ideas diversity competition localism and universal service continue to serve as the primary objectives for policymakers and as the focal points for contemporary policy controversies This volume focuses on these principles examining their underlying motivations and assumptions their central components their different interpretive approaches and their continued applicability in a rapidly changing electronic media environment Central to this book's analysis is the need for more thorough and rigorous application of these principles as tools for policy analysis rather than primarily as rhetorical devices for justifying policy outcomes Toward this end the book explicitly links each of these principles with communication policy analysis and illustrates how the dynamics of the policymaking process undermine the analytical utility of the foundation principles
