## **Making Environmental Policy Two Views Aei Studies On Global Environmental:**

*Making Environmental Policy* Irwin M. Stelzer, Paul R. Portney, 1998 Two prominent economists comment on the bitter divisive and passionate debate on the proper direction of environmental policy

**The Benefits and Costs of the Kyoto Protocol** Jason F. Shogren, 1999 This book considers the driving elements behind the benefits and costs of climate protection via Kyoto or similar international agreements that follow

**What Has the Kyoto Protocol Wrought?** Robert William Hahn, Robert N. Stavins, 1999 This volume investigates the potential performance of the Kyoto Protocol's international trading mechanisms in the presence of diverse types of domestic greenhouse policy instruments

**Environmental Protection** John E. Blodgett, 2004 This book summarizes briefly a number of new approaches grouped under the following categories information approaches to improve the quantity and quality of information to enhance the knowledge base underlying environmental decision eg risk assessment cost benefit analysis public sector processes approaches to restructure governmental processes for making environmental decisions eg devolution incentives approaches that emphasize incentives as opposed to regulatory or financial penalties for achieving environmental ends market mechanisms approaches that rely on markets and common law for environmental decision to the extent possible and management principles approaches to inculcate environmental values in public or private managerial decisions eg sustainability page viii

**AEI Annual Report** American Enterprise Institute for Public Policy Research, 2001

**Climate Change: Science, Strategies, and Solutions** Eileen Claussen, 2022-05-16 It is the greatest environmental challenge of the 21st Century But what do we truly know about global climate change And what can we do about it Most of the world's top scientists agree that emissions of carbon dioxide and other greenhouse gases from human activities such as industrial processes fossil fuel combustion and land use changes are causing the earth to get warmer Impacts of this warming may include damage to our coastal areas accelerated rates of species loss altered agricultural patterns and increased incidences of infectious diseases The effects of climate change and efforts to mitigate climate change could also have substantial economic ramifications The book presents the latest research and analysis from prominent scientists economists academics and policy makers including Tom Wigley and Joel Smith who along with other authors of the Science and Impacts chapter explain the basic science of climate change the growing evidence that human activities are changing our climate and the impacts of these changes Eileen Claussen John Gummer Henry Lee and other authors of the Global Strategies chapter who describe what nations are or are not doing to address climate change and the state of international climate talks Robert Stavins John Weyant Ev Ehrlich and other economists who explain why economic analyses of climate policy are conducted why the projected costs of addressing climate change vary so widely among economic models and how changes driven by today's economy can influence climate policy Gov Jean Shaheen and other authors of the Innovative Solutions chapter who describe what state and local governments in the United States and multinational companies are doing to monitor and curb greenhouse gas emissions and

Forest Reinhardt who offers business leaders advice on steering their companies on a path that is healthy for business as well as the global climate This publication has also been published in paperback please click here for details

**Reconstructing Climate Policy** Richard B. Stewart,Jonathan Baert Wiener,2003 An examination of the current impasse in climate policy and the potential steps nations can take to reduce greenhouse gases [The Economics and Politics of Climate Change](#) Robert William Hahn,1998 Policymakers should address climate change by developing a capacity to measure greenhouse gas emissions and to implement cost effective ways of limiting emissions **Climate Change** Eileen Claussen,Vicki Arroyo Cochran,Debra P. Davis,2001-01-01 It is the greatest environmental challenge of the 21st Century But what do we truly know about global climate change And what can we do about it Most of the world s top scientists agree that emissions of carbon dioxide and other greenhouse gases from human activities such as industrial processes fossil fuel combustion and land use changes are causing the earth to get warmer Impacts of this warming may include damage to our coastal areas accelerated rates of species loss altered agricultural patterns and increased incidences of infectious diseases The effects of climate change and efforts to mitigate climate change could also have substantial economic ramifications The book presents the latest research and analysis from prominent scientists economists academics and policy makers including Tom Wigley and Joel Smith who along with other authors of the Science and Impacts chapter explain the basic science of climate change the growing evidence that human activities are changing our climate and the impacts of these changes Eileen Claussen John Gummer Henry Lee and other authors of the Global Strategies chapter who describe what nations are or are not doing to address climate change and the state of international climate talks Robert Stavins John Weyant Ev Ehrlich and other economists who explain why economic analyses of climate policy are conducted why the projected costs of addressing climate change vary so widely among economic models and how changes driven by today s economy can influence climate policy Gov Jean Shaheen and other authors of the Innovative Solutions chapter who describe what state and local governments in theUnited States and multinational companies are doing to monitor and curb greenhouse gas emissions and Forest Reinhardt who offers business leaders advice on steering their companies on a path that is healthy for business as well as the global climate This publication has also been published in paperback please click here for details **The British National Bibliography** Arthur James Wells,2003 [Costs and Benefits of Greenhouse Gas Reduction](#) Thomas C. Schelling,1998 Little will be done in the near future to reduce greenhouse gas emissions providing an opportunity to develop programmes for research subsidization and regulation This text focuses on specific issues such as global climate change and the institutional arrangements required to deal with them [The Political Economy of Environmental Regulation](#) Robert N. Stavins,2004 This new authoritative collection comprises previously published papers on the political economy of environmental regulation economic analyses of the processes through which political decisions regarding environmental regulation are made principally in the institutional context found in the United States Despite this geographic focus many of

the papers contain analytical models that are methodologically of interest and or have lessons that are relevant in other parts of the world In the environmental realm questions of political economy emerge along three fundamental dimensions which are closely interrelated but conceptually distinct 1 the degrees of government activity 2 the form of government activity and 3 the level of government that has responsibility The first three parts of the book deal respectively with these three fundamental dimensions of inquiry The fourth part of the book examines the use of economic analysis in contemporary environmental policy The Political Economy of Environmental Regulation will be of significant interest to environmental scholars students and policy makers alike

**Economics as Religion** Robert H. Nelson, 2014-08-15 Robert Nelson's *Reaching for Heaven on Earth: Economics as Religion and The New Holy Wars* Economic Religion Versus Environmental Religion in Contemporary America read almost like a trilogy exploring and charting the boundaries of theology and economics from the Western foundations of ancient Greece through the traditions that Nelson identifies as Protestant and Roman and on into modern economic forms such as Marxism and capitalism as well as environmentalism Nelson argues that economics can be a genuine form of religion and that it should inform our understanding of the religious developments of our times This edition of *Economics as Religion* situates the influence of his work in the scholarly economic and theological conversations of today and reflects on the state of the economics profession and the potential implications for theology economics and other social sciences

**Nuclear Politics in America** Robert J. Duffy, 1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020 [Subject Guide to Books in Print](#) , 1997 *What Should be the Future Direction of the Foreign Policy of the United States?* Library of Congress.
