The History of Medical Education in Britain ,2020-01-29 Professional education forms a key element in the transmission of medical learning and skills in occupational solidarity and in creating and recreating the very image of the practitioner Yet the history of British medical education has hitherto been surprisingly neglected Building upon papers contributed to two conferences on the history of medical education in the early 1990s this volume presents new research and original synthesis on key aspects of medical instruction theoretical and practical from early medieval times into the present century Academic and practical aspects are equally examined and balanced attention is given to different sites of instruction be it the university or the hospital The crucial role of education in medical qualifications and professional licensing is also examined as is the part it has played in the regulation of the entry of women to the profession Contributors are Juanita Burnby W F Bynum Laurence M Geary Faye Getz Johanna Geyer Kordesch S W F Holloway Stephen Jacyna Peter Murray Jones Helen King Susan C Lawrence Irvine Loudon Margaret Pelling Godelieve Van Heteren and John Harley Warner

Corporate Patronage of Art and Architecture in the United States, Late 19th Century to the Present Monica E. Jovanovich, Melissa Renn, 2019-04-18 This interdisciplinary collection of case studies rethinks corporate patronage in the United States and reveals the central role corporations have played in shaping

American culture This volume offers new methodologies and models for the subject of corporate patronage and contains an extensive bibliography on corporate patronage art collections and exhibitions sponsorship and philanthropy in the United States The case studies herein go beyond the usual focus on corporate sponsorship and collecting to explore the complex organizational networks and motivations behind corporate commissions Featuring chapters on Margaret Bourke White Julie Mehretu Maxfield Parrish Pablo Picasso Diego Rivera Eugene Savage Millard Sheets and Kehinde Wiley as well as studies on Andrew Carnegie Andrew Mellon John D Rockefeller Sr and Jr and Dorothy Shaver and companies such as Herman Miller and Lord and Taylor this volume looks at a wide array of works ranging from sculpture photography mosaics and murals to advertisements department store displays sportswear medical schools and public libraries *Tulane* Clarence L. Mohr, Joseph E. Gordon, 2001-03-01 Tulane is the story of a southern school striving for national recognition in the post World War II era of American research universities Clarence L Mohr and Joseph E Gordon present a candid in depth treatment of the 150 year old New Orleans institution during this transformative period when it grappled with such pervasive issues as federal and private funding academic freedom an enrollment surge set in motion by the GI Bill and sustained by the postwar baby boom the cold war desegregation the antiwar civil rights and student power movements expanding intercollegiate athletics censorship the clash between liberal and utilitarian conceptions of higher learning revision of curricular content and the role of universities as platforms for social criticism all of which together profoundly altered the mission of American higher learning In addition to these external forces the authors examine the many individuals administrators professors and students whose responses in both calm and crises shaped the evolution of Tulane's unique academic physical and demographic design Like its regional peers in the 1950s and 1960s Tulane faced the challenge of transcending its past without repudiating traditions of lasting value From a loose confederation of locally oriented undergraduate and professional schools it developed into a nationally focused research university serving a diverse student body selected through rigorous admissions standards Its journey over the past half century should remind those who support study or teach in American universities that their own institutions during that period have in a very real sense made history as well **The Birth of Development** Amy L. S. Staples, Amy L. Sayward, 2006 A comprehensive examination of economic globalization Focused on the creation and evolution of post 1945 internationalist ideology *The Birth of Development* highlights efforts to diffuse the destructive role of the nation state in world affairs by constructing truly international organizations with global agendas the World Bank the Food and Agriculture Organization and the World Health Organization These organizations and the men and women who worked for them pioneered the advancement of the quality of life for all and established an ongoing obligation to promote worldwide economic development As author Amy Staples reveals the results of their efforts were mixed Grounded in archival research conducted in the archives of the World Bank Food and Agriculture Organization and World Health Organization as well as in other archives in the United States Canada and Great Britain *The Birth of Development* provides a

foundational understanding for many of today's debates on economic globalization especially those that involve the World Bank and World Trade Organization Given the current role of international peacekeepers and multinational aid agencies this story is timely and makes clear that the issues that confronted early postwar planners and reformers remain in many ways unsolved even today *The Birth of Development* is the only comparative study of these crucial architects of the theory and practice of economic development and it contributes significantly to the ongoing effort to view the postwar period as more than simply an East West Cold War It breaks new ground conceptually and methodologically and will be a welcome addition to the literature in the fields of modern diplomatic history and international relations

History of Universities Mordechai Feingold, 2014-03-27 This is one of the volumes in a series of books covering the history of universities It contains a mix of learned chapters and book reviews which covers topics related to higher education The volume provides original research and invaluable reference material

The New Encyclopedia of Southern Culture Clarence L. Mohr, Charles Reagan Wilson, 2011-05-16 Offering a broad up to date reference to the long history and cultural legacy of education in the American South this timely volume of *The New Encyclopedia of Southern Culture* surveys educational developments practices institutions and politics from the colonial era to the present With over 130 articles this book covers key topics in education including academic freedom the effects of urbanization on segregation desegregation and resegregation African American and women's education and illiteracy These entries as well as articles on prominent educators such as Booker T Washington and C Vann Woodward and major southern universities colleges and trade schools provide an essential context for understanding the debates and battles that remain deeply imbedded in southern education Framed by Clarence Mohr's historically rich introductory overview the essays in this volume comprise a greatly expanded and thoroughly updated survey of the shifting southern education landscape and its development over the span of four centuries

Greater Than the Parts Christopher Lawrence, George Weisz, 1998 The history of orthodox biomedicine in the twentieth century is usually depicted as one of increasing reductionism and dependence on laboratory sciences and technology Holism today is commonly regarded as an alternative to regular healing and a reaction to it In fact in the interwar years clinicians and basic scientists in Europe and North America responded to what they perceived as the increasing reductionism routinizing and mechanization of the biomedical sciences and clinical practice by creating holistic models of the body's activities and models of healing based the whole individual sufferer Holistic responses were also visible in public health and epidemiology The essays collected here explore this previously neglected area They show how the holistic turn in orthodox medicine in the interwar years was a reaction to the scientific reductionism and the specialization and division of labor and medicine In addition all show how this movement was part of a more general response to modernity itself political
