## **Making Of Knowledge In Composition Portrait Of An Emerging Field:**

*The Making of Knowledge in Composition* Stephen M. North, 1987 In a style that combines scholarly care with remarkable readability North examines the development of the field of composition in a way it has not been examined before Rather than focusing on what people claim to know about teaching writing he concerns himself primarily with how they claim to know it Eight groups of knowledge makers are treated in separate chapters Practitioners Historians Philosophers Critics Experimentalists Clinicians Formalists and Ethnographers Each of these chapters orients the reader by tracing the mode's first uses in the field and listing its best known and most important adherents then goes on to explain how the mode of inquiry works illustrating key points with painstaking analysis of well known studies In his final three chapters North turns from these individual modes to consider the field as a whole How have these different ways of making knowledge come together What is Composition now and what is it likely to become "Rimmed Indications" Glynis R. Benbow-Niemier, 1994

Bibliographic Research in Composition Studies Vicki Byard, 2009-10-02 Bibliographic Research in Composition Studies is a student friendly guide to how knowledge is constructed and disseminated in composition studies as well as a thorough handbook on how to conduct bibliographic research in the discipline Student readers are taught Stephen North's taxonomy of scholarship empirical research and practice so that they can better contextualize the sources they read and they learn the unique ways that some genres of publication function in composition studies The book also leads students through the entire process of completing a bibliographic assignment Changing of Knowledge in Composition Lance Massey, Richard C. Gephardt, 2011-07-16 Lance Massey and Richard Gephardt offer in this collection many signs that composition again faces a moment of precariousness even as it did in the 1980s the years of the great divorce from literary studies The contours of writing in the university again are rapidly changing making the objects of scholarship in composition again unstable Composition is poised to move not from modern to postmodern but from process to postprocess from a service oriented field to a research driven discipline Some would say we are already there Momentum is building to replace composition and the pedagogical imperative long implied in that term with a writing studies model devoted to the study of composition as a fundamental tool of and force within all areas of human activity Appropriately contributors here use Stephen M North's 1987 book *The Making of Knowledge in Composition* to frame and background their discussion as they look at both the present state of the field and its potential futures As in North's volume *The Changing of Knowledge in Composition* describes a body of research and pedagogy brimming with conflicting claims methodologies and politics and with little consensus regarding the proper subjects and modes of inquiry The deep ambivalence within the field itself is evident in this collection Contributors here envision composition both as retaining its commitment to broad based generalized writing instruction and as heading toward content based vertical writing programs in departments and programs of writing studies They both challenge and affirm composition's pedagogical heritage And they sound both sanguine and pessimistic notes about
