**Designing the Doll** Susanna Oroyan, 2010-11-05 The author of *Anatomy of a Doll* gives us a gift by distilling the spirits found in doll figure art then explains the fundamentals to pave the way Barbara Campbell editor of *Soft Dolls Animals* Advance your dollmaking skills with this in depth guide by master dollmaker Susanna Oroyan Susanna introduces you to her concept of imaginative engineering with a collection of design directions and technical processes that will help your ideas translate into reality Expands on concepts presented in *Anatomy of a Doll* and *Fantastic Figures* Covers a wide variety of construction methods such as applications of wire armature in body construction general concepts of mold making sculpture mechanics in depth discussion of jointed figures and methods of assembling your doll More than 250 full color photos of dolls from 130 of the world's top doll artists Over 200 detailed illustrations Explains elements of design such as focal point scale harmony style and the use of color texture and pattern Learn techniques of proportion for working with the human figure An excellent technical resource and reference book that will teach you how to develop ideas then construct advanced art figures or dolls The doll world has only just recovered from the excitement of having *Anatomy of a Doll* which showed us what was possible Now we can learn to get it with this new effort the fabulous *Designing the Doll* Thank you Susanna where would we be without you Elinor Peace Bailey author of *Storytelling with Dolls* Demystifies the creation of dolls by offering techniques basic construction and some very good thoughts on design Filled with diagrams and color photos of dolls from some of the top contemporary doll makers inspiration is on every page Polymer Clay *Making To-Live-For Dolls* Celia Desmond, 2013-04 This book is a must read for anyone making a porcelain doll wanting to enter in a competition In the book you will find tips and information from notes taken at seminars and private lessons with the top doll makers in the world today There are two main categories of porcelain dolls modern and antique Modern dolls are those sculpted by modern artists Antique dolls are those that were first introduced and sold either more than fifty years ago or by some definitions more than one hundred years ago Actual antique dolls can be purchased for enjoyment and possibly to use as models for the making of reproductions Excellent reproductions of the antique dolls can be made by modern day artists Modern dolls are those sculpted by current day sculptors Modern dolls can be painted and dressed in any way the doll artisan prefers They can have painted eyes or the holes can be cut out from the porcelain before the bisque firing to allow the insertion of glass eyes Neither technique is easy Each has its own challenges and both look nice when done well These dolls can be dressed in any way the artist wishes as well Reproductions of antiques must be done so that the artist reproduces the original patterns and colors as they were initially done on the specific dolls This means reproducing the eyes with the same number of lashes that the artists painted on the antique dolls the same slant and the same spacing Dressing the antique reproductions poses another challenge as the dolls should be dressed in a period costume appropriate for that doll The fabrics should be natural fibers often actual vintage or antique fabrics Significant research is required to determine what styles fabrics and colors

should be used for specific dolls This book has a wonderful collection of tips collected from the experts These are helpful for all doll makers especially people preparing for competitions This book contains a wealth of information for lovers and makers of both modern and reproduction antique dolls The information has been collected over the years from most of the most talented and experienced doll makers in the world It is shared here with those interested in preserving this art approaching each aspect of the doll in the best way possible
