*Function Theoretic Methods in Differential Equations* Robert P. Gilbert, Richard Jay Weinacht, 1976      **Function Theoretic Methods in Differential Equations** Robert P. Gilbert, R. J. Weinacht, 1978      **Function Theoretic Methods in Differential Equations** Robert P. Gilbert, 1976

Generalizations of analytic function theory On the convolution product in discrete functions theory On  $K$  monogenic functions of a quaternion variable On zeros of elliptic systems of first order in the plane Generalized maximum principles in certain classes of pseudoanalytic functions Integral operations On singular integral operators on piecewise smooth lines On singular integral operators Boundary value problems On singular solutions of strongly nonlinear systems of ordinary differential equations On a nonlinear boundary value problem Systems of Abel

**Function Theoretic Methods in Partial Differential Equations** Gilbert, 1969 *Function Theoretic Methods in Partial Differential Equations*      *Complex Methods for Partial Differential Equations* Heinrich Begehr, A. Okay Celebi, W. Tutschke, 2013-12-01

This volume is a collection of manuscripts mainly originating from talks and lectures given at the Workshop on Recent Trends in Complex Methods for Partial Differential Equations held from July 6 to 10 1998 at the Middle East Technical University in Ankara Turkey sponsored by The Scientific and Technical Research Council of Turkey and the Middle East Technical University This workshop is a continuation of two workshops from 1988 and 1993 at the International Centre for Theoretical Physics in Trieste Italy entitled Functional analytic Methods in Complex Analysis and Applications to Partial Differential Equations Since classical complex analysis of one and several variables has a long tradition it is of high level But most of its basic problems are solved nowadays so that within the last few decades it has lost more and more attention The area of complex and functional analytic methods in partial differential equations however is still a growing and flourishing field in particular as these methods are not only applied Within the framework of holomorphic functions but are also combined with properties of generalized analytic functions This can be seen by the many books which recently were published in this field and also by the proceedings in this ISAAC series and the ISAAC congresses and workshops

**Function Theoretic Methods for Partial Differential Equations** V. E. Meister, N. Weck, W. L. Wendland, 2014-09-01

*Functional Methods in Differential Equations* Veli-Matti Hokkanen, Gheorghe Morosanu, 2002-04-26

In recent years functional methods have become central to the study of theoretical and applied mathematical problems As demonstrated in this Research Note functional methods can not only provide more generality but they can also unify results and techniques and lead to better results than those obtained by classical methods Presenting      [Application of Holomorphic Functions in Two and Higher Dimensions](#) Klaus Gürlebeck, Klaus Habetha, Wolfgang Sprößig, 2016-06-20

This book presents applications of hypercomplex analysis to boundary value and initial boundary value problems from various areas of mathematical physics Given that quaternion and Clifford analysis offer natural and intelligent ways to enter into higher dimensions it starts with quaternion and Clifford versions of complex function theory including series expansions with Appell polynomials as well as

Taylor and Laurent series Several necessary function spaces are introduced and an operator calculus based on modifications of the Dirac Cauchy Fueter and Teodorescu operators and different decompositions of quaternion Hilbert spaces are proved Finally hypercomplex Fourier transforms are studied in detail All this is then applied to first order partial differential equations such as the Maxwell equations the Carleman Bers Vekua system the Schrödinger equation and the Beltrami equation The higher order equations start with Riccati type equations Further topics include spatial fluid flow problems image and multi channel processing image diffusion linear scale invariant filtering and others One of the highlights is the derivation of the three dimensional Kolosov Mushkelishvili formulas in linear elasticity Throughout the book the authors endeavor to present historical references and important personalities The book is intended for a wide audience in the mathematical and engineering sciences and is accessible to readers with a basic grasp of real complex and functional analysis

*Analytical and Computational Methods in Scattering and Applied Mathematics* Fadil Santosa, Ivar Stakgold, 2019-05-07 Professor Ralph Kleinman was director of the Center for the Mathematics of Waves and held the UNIDEL Professorship of the University of Delaware Before his death in 1998 he made major scientific contributions in the areas of electromagnetic scattering wave propagation and inverse problems He was instrumental in bringing together the mathematic *Partial Differential Equations With Complex Analysis* H Begehr, Alan Jeffrey, 1992-11-02 A collection of papers on function theory and function theoretic methods in PDEs Results are obtained using a variety of complex analytic methods e.g Bergman and Vekua geometric function theory and the Riemann Hilbert boundary value problem

**Complex Analysis I** A.A. Gonchar, Viktor P. Havin, N.K. Nikolski, 2013-11-11 A two part volume containing a comprehensive description of the theory of entire and meromorphic functions of one complex variable and its applications and a detailed review of recent investigations concerning the function theoretical peculiarities of polyanalytic functions boundary behaviour value distributions degeneration uniqueness etc

**Global Analysis - Studies and Applications V** Yuri G. Borisovich, Yuri E. Gliklikh, 2006-11-15 This volume a sequel to LNM 1108 1214 1334 and 1453 continues the presentation to English speaking readers of the Voronezh University press series on Global Analysis and Its Applications The papers are selected from two Russian issues entitled Algebraic questions of Analysis and Topology and Nonlinear Operators in Global Analysis
