**Postcomposition** Sidney I Dobrin, 2011-06-02 Leading a burgeoning self critical moment in composition studies and writing program administration Postcomposition is a fundamental reconsideration of the field that attempts to shift the focus away from pedagogy and writing subjects and toward writing itself In this forceful and reasoned critique of many of the primary tenets and widely accepted institutional structures of composition studies Sidney I Dobrin delivers a series of shocks to the system meant to disrupt the pedagogical imperative and move beyond the existing limits of the discipline Dobrin evaluates the current state of composition studies underscoring the difference between composition and writing and arguing that the field's focus on the administration of writing students and its historically imposed prohibition on theory greatly limit what can be understood about writing Instead he envisions a more significant approach to writing one that questions the field's conservative allegiance to subject and administration and reconsiders writing as spatial and ecological Using concepts from ecomposition spatial theory network theory complexity theory and systems theory Postcomposition lays the groundwork for a networked theory of writing and advocates the abandonment of administration as a useful part of the field He also challenges the usefulness of rhetoric in writing studies showing how writing exceeds rhetoric Postcomposition is a detailed consideration of how posthumanism affects the field's understanding of subjectivity It also tears at the seams of the contingent labor problem As he articulates his own frustrations with the conservatism of composition studies and builds on previous critiques of the discipline Dobrin stages a courageous and inevitably polemical intellectual challenge to the entrenched ideas and assumptions that have defined composition studies

*Multimodal Composing and Writing Transfer* Kara Poe Alexander, Matthew Davis, Lilian W. Mina, Ryan P. Shepherd, 2024-02-15 Multimodal Composing and Writing Transfer explores transfer across various contexts of multimodal composing extending the early conversations connecting multimodality to writing Contributors address how writing transfer theories intersect with multimodal composing and present methods for facilitating transfer across modes and media offering insight into how writers can learn to compose when they encounter familiar modes in new contexts Over the past two decades the concepts of multimodal composing and writing transfer have grown and reshaped the nature of writing studies but rarely have the ways in which these areas overlap been studied This collection shows how this shift in writing studies has been mutually informative covering a wider range of contexts for multimodality and writing transfer than just in first year composition courses It places composition teaching practices and multimodal research in conversation with learning transfer theory to provide an in depth examination of how they influence one another Multimodal Composing and Writing Transfer develops

these intersections to connect multimodal composition and writing practices across a wide array of fields and contexts Scholars across disciplines postsecondary writing teachers writing program administrators writing center directors and graduate students will find this collection indispensable *Catalog and Yearbook* University of Northern Colorado,1925
