## **Major Attraction:**

*Managing Visitor Attractions* Alan Fyall, Brian Garrod, Anna Leask, Stephen Wanhill, 2022-05-30 Visitor attractions represent a complex sector of the tourism industry and are the catalytic focus for the development of tourism infrastructure and services. The third edition of this successful text investigates these issues further and provides more solutions and suggestions for the present and future. Now in its third edition, *Managing Visitor Attractions* has been fully revised and updated to include new content on increased visitor numbers, new destinations and attractions, social media, overtourism, environmental awareness, and the experience economy. The book includes case studies on topics such as overtourism at natural attraction sites, new attraction development in Egypt, dark tourism in Latin America, dementia-friendly attractions, and managing sporting venues as attractions. New chapters include the role of the visitor attraction manager, managing safety and risk, themed attractions, and storytelling and digital marketing among many others. With contributions from around the world, this is an essential text for undergraduate and postgraduate students of visitor attraction management, written by subject specialists with a wealth of experience in this field.

**Visitor Attractions and Events** Adi Weidenfeld, Richard Butler, Allan M. Williams, 2016-04-28 Both visitor attractions and events play pivotal roles in the appeal of tourism destination regions to visitors by virtue of being the main motivator of tourist trips and determining consumers' choices. However, more recently, visitor attractions have become more multifaceted, have proliferated, and fragmented in terms of form, location, scale, and style, and their role is undergoing major changes in a post-modern world as a result of consumer demands and competitive innovations. *Visitor Attractions and Events* for the first time theoretically and empirically explores the relations between events and attractions to offer new thinking of the role of space and place in shaping development, management practices, and strategies in the sector, as well as future implications. The book reveals how location is pivotal in the development, planning, and management of visitor attractions and events. Whereas the location of natural attractions is relatively fixed in space and their locations cannot be predetermined or relocated, human-made or contrived attractions are more influenced by the planning process in the context of the locational decision-making process. Competition and cooperation between visitor attractions and the aspects which shape these relations, including complementarities, compatibility, knowledge spillovers, and diffusion of innovations, product similarities, and spatial proximity remain largely ignored in the visitor attraction sector and thus are major elements in the focus of this book. Comparative examples ranging from small to major attractions in a wide variety of locations are included. This significant volume will appeal widely to all those interested in the visitor sector, such as tourism events, leisure studies, destination management, and sociology.
