Make It With Plants Pb:

Phytoremediation of Contaminated Soil and Water Norman Terry, Gary S. Banuelos, 2020-11-25 Phytoremediation is an exciting new technology that utilizes metal accumulating plants to rid soil of heavy metal and radionuclides. Hyperaccumulation plants are an appealing and economical alternative to current methods of soil recovery. Phytoremediation of Contaminated Soil and Water is the most thorough literary examination of the subject available today. The successful implementation of phytoremediation depends on identifying plant material that is well adapted to specific toxic sites. Gentle remediation is then applied in situ or at the contamination site. No soil excavation or transport is necessary. This severely contains the potential risk of the pollutants entering the food chain. And it's cost effective. The progress of modern man has created many sites contaminated with heavy metals. The effected land is toxic to plants and animals which creates considerable public interest in remediation. But the commonly used remedies are ex situ which poses an expensive dilemma and an even greater threat. Phytoremediation offers the prospect of a cheaper and healthier way to deal with this problem. Read *Phytoremediation of Contaminated Soil and Water* to learn just how far this burgeoning technology has developed.

Children as Writers. 4, 1977 **Pacific Rural Press**, 1879 Morphosyntactic Variation in Bantu Eva-Marie Bloom Ström, Hannah Gibson, Rozenn Guérois, Lutz Marten, 2024-11-05 This volume explores the rich and complex pattern of morphosyntactic variation in the Bantu languages providing a comprehensive overview of the wealth of empirical and conceptual work in the field. The chapters discuss data from some 80 Bantu languages as well as drawing on a wider comparative set of more than 200 languages from across Central Eastern and Southern Africa. Some studies focus on one specific language in a comparative context. Some investigate fine grained variation among a close knit group of languages and others present large scale comparative studies spanning the whole of the Bantu speaking area. The contributors address a range of topics from a micro variation perspective primarily in the areas of nominal and verbal morphology and syntax and information structure. The volume highlights key aspects of contemporary research in Bantu morphosyntax and outlines distinct and novel approaches to prominent questions. It combines the most recent thinking on morphosyntactic variation in Bantu with different theoretical and methodological approaches and novel empirical data from a wide range of languages.
