Making Disability:

Making Disability Modern Bess Williamson, Elizabeth Guffey, 2020-07-23 Making Disability Modern Design Histories brings together leading scholars from a range of disciplinary and national perspectives to examine how designed objects and spaces contribute to the meanings of ability and disability from the late 18th century to the present day and in homes offices and schools to realms of national and international politics The contributors reveal the social role of objects particularly those designed for use by people with disabilities such as walking sticks wheelchairs and prosthetic limbs and consider the active role that makers users and designers take to reshape the material environment into a usable world But it also aims to make clear that definitions of disability and ability are often shaped by design **Making Disability** Paul C. Higgins, 1992

Making and Unmaking Disability Julie E. Maybee, 2019-09-16 If the future is accessible as Alisa Grishman one of 55 million Americans categorized as having a disability writes in this book's cover image then we must stop making or constructing people as disabled and impaired In this brave new theoretical approach to human physicality Julie E Maybee traces societal constructions of disability and impairment through Western history along three dimensions of embodiment the personal body the interpersonal body and the institutional body Each dimension has played a part in defining people as disabled and impaired in terms of employment healthcare education and social and political roles Because impairment and disability have been constructed along all three of these bodies unmaking disability and making the future accessible will require restructuring Western institutions including capitalism changing how social roles are assigned and transforming our deepest beliefs about impairment and disability to reconstruct people as capable Ultimately Maybee suggests unmaking disability will require remaking our world **Disability and Social Theory** D. Goodley, B. Hughes, L. Davis, 2012-06-01 This

comprehensive interdisciplinary collection examines disability from a theoretical perspective challenging views of disability that dominate mainstream thinking Throughout social theories of disability intersect with ideas associated with sex gender race ethnicity class and nation Disability, Space, Architecture: A Reader Jos Boys, 2017-02-17 Disability Space Architecture A Reader takes a groundbreaking approach to exploring the interconnections between disability architecture and cities The contributions come from architecture geography anthropology health studies English language and literature rhetoric and composition art history disability studies and disability arts and cover personal theoretical and innovative ideas and work Richer approaches to disability beyond regulation and design guidance remain fragmented and difficult to find for architectural and built environment students educators and professionals By bringing together in one place some seminal texts and projects as well as newly commissioned writings readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design Most crucially Disability Space Architecture A Reader opens up not just disability but also ability disability as a means of refusing the normalisation of only particular kinds of bodies in the design of built space It reveals how our everyday social attitudes and practices about people

objects and spaces can be better understood through the lens of disability and it suggests how thinking differently about disability can enable innovative and new kinds of critical and creative architectural and urban design education and practice

Federal Register, 1981-05-26 **Designing Disability** Elizabeth Guffey, 2017-12-28 Designing Disability traces the emergence of an idea and an ideal physical access for the disabled through the evolution of the iconic International Symbol of Access ISA The book draws on design history material culture and recent critical disability studies to examine not only the development of a design icon but also the cultural history surrounding it Infirmity and illness may be seen as part of human experience but disability is a social construct a way of thinking about and responding to a natural human condition Elizabeth Guffey's highly original and wide ranging study considers the period both before and after the introduction of the ISA tracing the design history of the wheelchair a product which revolutionised the mobility needs of many disabled people from the 1930s onwards She also examines the rise of barrier free architecture in the reception of the ISA and explores how the symbol became widely adopted and even a mark of identity for some especially within the Disability Rights Movement Yet despite the social progress which is inextricably linked to the ISA a growing debate has unfurled around the symbol and its meanings The most vigorous critiques today have involved guerrilla art graffiti and studio practice reflecting new challenges to the relationship between design and disability in the twenty first century

In the making: Digital fabrication and disability Ursula Kate Hurley, 2020-07-14 Digital fabrication combines virtual and material worlds transforming thoughts into things and things into data It fosters complex and varied communities while enabling the pursuit of unique individual outputs Current literature on digital fabrication concentrates on its technical and economic potential with little attention yet being paid to the fundamental questions of how the technology might affect our understanding of identity embodiment or creative processes Using case studies and experiences gained from ground breaking fieldwork In the Making explores these processes and their products from both cultural and aesthetic perspectives with emphasis on its human interactions not on technology Embracing the absence of established methodologies in their emerging area of investigation this volume offers a series of wide ranging and original interdisciplinary framings which arise from the materials themselves That very act of imagining of selecting and committing to an envisaged but not yet physically present product offers insights into needs and desires What is the story of that design How did it come to be The basic principles of digital fabrication the transformation from concept to physical entity offer intriguing possibilities for aesthetic and cultural readings particularly from the perspectives of disability Online open access maker communities mean that anyone with an internet connection and a desktop 3D printer is able to download and print a wide variety of replicable and customisable objects What might this mean for disabled people As digital fabrication technologies enter mainstream society In the making poses urgently applicable questions about presence existence and authenticity and begins to suggest how we might explore them **The**
