Making Music at the Bottom of the World in Southland, Aotearoa/New Zealand Sally Bodkin-Allen, 2020-01-21 This volume brings together a number of perspectives on the musical landscape of Invercargill a city at the bottom of Aotearoa New Zealand Invercargill is in many ways unique it is relatively isolated its access to liquor is controlled by a licensing trust and it is home to the longest serving mayor in Aotearoa The musicking that occurs within Invercargill is surprisingly diverse and wide ranging This book acknowledges and explores many of the South's musical communities and in doing so illustrates the importance of music in local communities It highlights the ways in which social connectedness local identity and individual lives are enriched through musical activities being interwoven through communities **In All Kinds of Weather, Kids Make Music!** Lynn Kleiner, 2001 Award winning instructor and early childhood music pioneer Lynn Kleiner shares her innovative lesson plans for toddlers through primary age children that capture the magical power and excitement of interactive musical learning Enjoy 35 songs poems and stories for all seasons that will delight children and stimulate their responses to music For teachers parents and caregivers Videos and instrument kits available through Remo Inc Any Sound You Can Imagine Paul Théberge, 1997-06-23 Describes digital musical instruments industries that supply and promote them and the meanings they have for musicians Winner of the International Association for the Study of Popular Music IASPM Book Award 1997 Recent innovations in musical instrument design are not simply a response to the needs of musicians writes Paul Théberge they also have become a driving force with which musicians must contend He argues that digital synthesizers samplers and sequencers in studio production and in the home have caused musicians to rely increasingly on manufacturers for both the instruments themselves as well as the very sounds and musical patterns that they

use to make music Musical practices have thus become allied with a new type of consumer practice that is altogether different from earlier relationships between musicians and their instruments as a means of production Th berge places these developments within a broad social and historical perspective that examines the development of the musical instrument industry particularly the piano industry the economic and cultural role of musicians magazines and computer networks and the fundamental relationships between musical concepts styles and technology

The Making of Irish Traditional Music Helen O'Shea,2008 The book challenges the notion that Irish Traditional music expresses an essential Irish identity arguing that it was an ideological construction of cultural nationalists in the nineteenth century later commodified by the music and tourism industries As a social process musical performance is complicated by the varying experiences of musicians and listeners The question of an Irish identity expressed musically is further explored through the experiences of both local and foreign musicians including the author The conclusion that a radicalised ideal of national culture and an assimilative model of cultural contact are compatible has important implications for Irish society today Irish traditional music is now performed and consumed world wide The Making of Irish Traditional Music considers the implications of this for the way we understand music s relationship to individual and collective identities such as ethnicity and nationality The core of this book is its analysis of the experiences of foreigners playing Irish music both in Australia and in the heart of Ireland s traditional music empire County Clare as pilgrims to summer schools
