## **Making Models:**

**Decision-Making Models** Tofiqh Allahviranloo, Witold Pedrycz, Amir Seyyedabbasi, 2024-07-24 *Decision Making Models A Perspective of Fuzzy Logic and Machine Learning* presents the latest developments in the field of uncertain mathematics and decision science. The book aims to deliver a systematic exposure to soft computing techniques in fuzzy mathematics as well as artificial intelligence in the context of real life problems and is designed to address recent techniques to solving uncertain problems encountered specifically in decision sciences. Researchers, professors, software engineers, and graduate students working in the fields of applied mathematics, software engineering, and artificial intelligence will find this book useful to acquire a solid foundation in fuzzy logic and fuzzy systems optimization problems and artificial intelligence practices as well as how to analyze IoT solutions with applications and develop decision making mechanisms realized under uncertainty. Introduces mathematics of intelligent systems which provides the usage of mathematical rigor such as precise definitions, theorems, results, and proofs. Provides extended and new comprehensive methods which can be used efficiently in a fuzzy environment as well as optimization problems and related fields. Covers applications and elaborates on the usage of the developed methodology in various fields of industry such as software technologies, biomedicine, image processing, and communications.

*Selection of Decision-Making Models in Intergovernmental Organizations: A Poliheuristic Approach to Political Regime Type Influence* Timothy Tamutana Tamunang, 2021-03-15. Until recently, Political Psychology of International Relations has attracted very few scholars' attention in explaining states' behaviors and attitudes as a juridical person. In reality, international relations scholarly works, especially related to Intergovernmental organizations, have shown that rational structural and functional accounts have failed to fully capture the underline nature of these institutions. A poliheuristic approach doesn't only solve these theoretical shortcomings but also allows for the close examination of states' attitudes and behaviors in making choices that would serve as tools for expected interests. This gives a chance to retrospect how were these bodies created, what were the environmental factors that led to their formations, and the nature of founders. Since organizations are adepts of metamorphosis, it is interesting to watch their overall changes. This book presents not only the existing views within the subject but also provides additional information which the author has proven to be relevant.

*Human-Centric Decision-Making Models for Social Sciences* Peijun Guo, Witold Pedrycz, 2013-11-01. The volume delivers a wealth of effective methods to deal with various types of uncertainty inherently existing in human-centric decision problems. It elaborates on comprehensive decision frameworks to handle different decision scenarios which help use effectively the explicit and tacit knowledge and intuition model perceptions and preferences in a more human-oriented style. The book presents original approaches and delivers new results on fundamentals and applications related to human-centered decision making approaches to business, economics, and social systems. Individual chapters cover multi-criteria, multi-attribute decision making, decision making with prospect theory, decision making with incomplete probabilistic information, granular models of

decision making and decision making realized with the use of non additive measures New emerging decision theories being presented as along with a wide spectrum of ongoing research make the book valuable to all interested in the field of advanced decision making The volume self contained in its nature offers a systematic exposure to the concepts design methodologies and detailed algorithms A prudent balance between the theoretical studies and applications makes the material suitable for researchers and graduate students in information computer sciences psychology cognitive science economics system engineering operation research and management science risk management public and social policy

The Unaffordable Price of Static Decision-making Models Fouad El Ouardighi, Gustav Feichtinger, 2025-07-01 At the 15th Viennese Workshop on Optimal Control and Dynamic Games held in July 2022 experts in economics and the management sciences identified a concerning trend static decision making models while less effective than dynamic ones are becoming increasingly prevalent This book aims to address the economic and social costs associated with reliance on static models and to demonstrate the advantages of applying dynamic approaches Static models may be easier to formulate but they often overlook the long term consequences of decisions promoting myopic practices that can lead to poor outcomes In contrast dynamic models foster a more comprehensive perspective enabling foresight in decision making which is crucial for issues involving stock variables such as pollution reputation and inventory The book explores the limitations of static models including their inability to capture long term outcomes history dependent solutions and the impact of abrupt contextual changes It also highlights recent advances in dynamic modeling techniques that can enhance accuracy and help adapt to complex decision making environments By promoting the shift from static to dynamic models this book aspires to open new research opportunities and provide valuable insights for researchers students policymakers and managers in the fields of economics and the management sciences *Wonderful Models* Percival Marshall, 1928 **DECISION MAKING STYLE:**

**Social and Creative Dimensions** DEV VERMA, 2009-12 As a leader or responsible person we often stuck with decision making It s our job to make decisions that are in the best interest of the whole organisation or to ourselves We must consider the good of many not of a few This is a big responsibility and very often people don t appreciate our efforts In fact many times people get angry at us because of the decisions we make to help them In this book we discuss decision making style Not the decision itself but style We hope that readers will appreciate this effort **Leadership for Health Professionals**
