Nations and Nationalism Ernest Gellner, 1983 This thoughtful and penetrating book addressed to political scientists sociologists historians and anthropologists interprets nationalism in terms of its social roots which it locates in industrial social organization Professor Gellner asserts here that a society's affluence and economic growth depend on innovation occupational mobility the effectiveness of the mass media universal literacy and an all embracing educational system based on a shared standard idiom These factors taken together govern the relationship between culture and the state Political units that do not conform to the principle one state one culture feel the strain in the form of nationalistic activity

Literacy as Involvement Deborah Brandt, 2011-02-18 In *Literacy as Involvement* Deborah Brandt examines the cultural and social roots of the acts of reading and writing The book asks for example whether literacy is a natural growth of or a radical shift from orality It questions the contrary views that literacy is either the learning of the conventions of language or is better understood as heightened social ability Finally it raises the possibility that knowing how to read and write is actually understanding how we respond during the acts of reading and writing This examination of literacy as process is also offered as a critique of prevailing theories of literacy advanced by such scholars as Walter J Ong S J David Olson and E D Hirsch They depict literacy as a textual experience that is socially and linguistically detached Brandt

critically examines the underlying assumptions from research on writing processes and argues that they call for a major reformation of prevailing conceptions of literacy Specifically she analyzes several expository texts from a process perspective to establish the interaction of reader and writer in even the most seemingly formal and detached writing In her conclusion Brandt brings together the major findings of her study to address pressing literacy issues including the problem of illiteracy in our schools *Humanities in Society* ,1981 **Monthly Bulletin of the Hebrew Sheltering and Immigrant Aid Society** ,1915 *Q in Matthew* Alan Kirk,2016-08-11 Advocates of the established hypotheses on the origins of the Synoptic gospels and their interrelationships the Synoptic Problem and especially those defending or contesting the existence of the source Q are increasingly being called upon to justify their position with reference to ancient media practices Still others go so far as to claim that ancient media realities force a radical rethinking of the whole project of Synoptic source criticism and they question whether traditional documentary approaches remain valid at all This debate has been hampered to date by the patchy reception of research on ancient media in Synoptic scholarship Seeking to rectify this problem Alan Kirk here mounts a defense grounded in the practices of memory and manuscript transmission in the Roman world of the Two Document Hypothesis He shows how ancient media memory approaches in fact offer new leverage on classic research problems in scholarship on the Synoptic Gospels and that they have the potential to break the current impasse in the Synoptic Problem The results of his analysis open up new insights to the early reception and scribal transmission of the Jesus tradition and cast new light on some long conflicted questions in Christian origins New Acquisitions Unesco Institute for Education. Documentation Centre and Library,2001 Media Environments and Mental Disorder William Indick,2021-05-14 The information environments that modern society requires us to master and engage in are based in literacy and digital communication Mediated information not only passes through our brains it alters and rewires them Since our environment to a large extent is shaped by the way we perceive understand and communicate information we can even think of mental disorders as symptoms of maladaptation to our media environments This book uses this media ecology model to explore the effects of media on mental disorders It traces the development of media from the most basic forms the sights and sounds expressed by the human body to the most technologically complex media created to date showing how each medium of communication relates to specific mental disorders such as anxiety depression schizophrenia and autism As the digital age proceeds to envelop us in an environment of infinite and instantly accessible information it s crucial to our own mental health to understand how the various forms of media influence and shape our minds and behaviors **Lifelong Education for Adults** C.J.
