

## Education for Individuals who are Profoundly Mentally Retarded (PMR) : An Educator's Perspective

Vinay Kumar Singh

One group of professionals who are involved predominantly in the management of individuals with mental retardation are Special Educators. Special Educators play a vital role in training and educating the individual with mental retardation, leading to their rehabilitation. It is well known that Special Educators find it difficult to train individuals, who are Profoundly Mentally Retarded (PMR), as they are much slower in learning than individuals with Mild and Moderate Retardation.

This paper includes the basic characteristics, educability of individuals who are PMR, the existing approaches, characteristics of educational planning and competencies of the educators, which may help the special educators to build up the skills to deal with these individuals effectively.

Several professional educators have taken the position that there is a population of individuals who are Profoundly Mentally Retarded (PMR), who are ineducable. In contrast, the past several decades have witnessed PMR individuals being taught a wide variety of meaningful behaviour. Education for individuals who are PMR, is somewhat different from individuals who are Mildly or Moderately Retarded. In a curriculum for individuals who are PMR, "how to teach" is as equally important as "what to teach". Essential prerequisites for a suitable curriculum planning and implementation are that the educators be aware of the basic characteristics and educability of individuals who are PMR, the existing approaches to educate them, characteristics of educational planning, and competencies of the educators for them.
