Impact evaluation of research by the International Food Policy Research Institute on agricultural trade liberalization, developing countries, and WTO's Doha negotiations Hewitt, Joanna,2008-08-12 This report assesses the impact of IFPRI's work on the agriculture negotiations in the WTO's Doha Round. It is set against the context of IFPRI's mission which emphasizes food security and the interests of poor people in low income countries and underlines the importance of active engagement in policy communications to link research work to policy action. The report also traces briefly the evolution of IFPRI's work on international agricultural trade more generally, noting its broad disposition to market-oriented policy prescriptions while illuminating the very different impacts of agricultural trade liberalization on individual developing countries through detailed research at the national and household level from Author's Abstract [Hunger 2000](#)

Food in America Andrew F. Smith,2017-02-16 This three volume work examines all facets of the modern U.S. food system including the nation's most important food and agriculture laws, the political forces that shape modern food policy and the food production trends that are directly impacting the lives of every American family. Americans are constantly besieged by conflicting messages about food, the environment and health and nutrition. Are foods with genetically modified ingredients safe? Should we choose locally grown food? Is organic food better than conventional food? Are concentrated animal feed operations destroying the environment? Should food corporations target young children with their advertising and promotional campaigns? This comprehensive three volume set addresses all of these questions and many more, probing the problems created by the industrial food system, examining conflicting opinions on these complex food controversies and highlighting the importance of food in our lives and the decisions we make each time we eat. The coverage of each of the many controversial food issues in the set offers perspectives from different sides to encourage readers to examine various viewpoints and make up their own minds. The first volume, Food and the Environment, addresses timely issues such as climate change, food waste, pesticides and sustainable foods. Volume two, entitled Food and Health and Nutrition, addresses subjects like antibiotics, food labeling and the effects of salt and sugar on our health. The third volume, Food and the Economy, tackles topics such as food advertising and marketing, food corporations, genetically modified foods, globalization and megagrocery chains. Each volume contains several dozen primary documents that include firsthand accounts written by promoters and advertisers, journalists, politicians and government officials and supporters and critics of various views related to food and beverages, representing speeches, advertisements, articles, books, portions of major laws and government documents to name a few. These documents provide readers additional resources from which to form informed opinions on food issues.

The Carter Presidency Gary M. Fink,Hugh Davis Graham,1998 After the Nixon and Ford administrations liberal Democrats hoped Jimmy Carter s election in 1976 would restore the New Deal agenda in the White House Instead during four tumultuous years in office Carter endorsed many of the fiscal and economic policies later espoused by his Republican successor Ronald Reagan But Carter also backed most New Deal social programs and however reluctantly pursued a traditional containment foreign policy In this book more than a dozen eminent scholars provide a balanced overview of key elements of Carter s presidency examining the significance of his administration within the context of evolving American policy choices after World War II They seek not only to understand the troubled Carter presidency but also to identify the changes that precipitated and accompanied the demise of the New Deal order By the time Carter took office many Americans had become disenchanted with big government and welfare spending and his presidency is viewed in these pages as a transitional administration As this volume demonstrates Carter s dilemma emerged from his effort to steer a course between traditional expectations of federal government and new political and economic realities While most of the contributors agree that his administration may be justly criticized for failing to find that course they generally conclude that Carter was more successful than his critics acknowledge These thirteen original essays cover such topics as the economy trade and industrial policies welfare reform energy environment civil rights feminism and foreign policy They offer thoughtful assessments of Carter s performance focusing on policy both as cause and effect of the post industrial transformation of American society that shadowed his administration A final essay shows how Carter s public spirited post presidential career has made him one of America s greatest ex presidents Grounded on research conducted at the Carter Library *The Carter Presidency* is an incisive reassessment of an isolated Democratic administration from the vantage point of twenty years It is a milestone in the historical appraisal of that administration inviting us to take a new look at Jimmy Carter and see what his presidency represented for a dramatically changing America

An Examination of Targeted Welfare Programs in the United States Amber Rojeana Casolari, 2001 This dissertation questions the underlying reasoning for targeted welfare programs in the United States Programs can target in various ways This work examines welfare programs that target specific household types and target the structure of the benefits In the first case policymakers have historically targeted female headed households while promoting the conventional household structure This dissertation examines using statistical analysis and regression analysis whether the structure of the household influences expenditures on basic necessities thereby warranting the target In the second case policymakers tie benefits to specific goods by providing assistance in kind rather than in cash This dissertation seeks to determine if the structure of the benefit influences the level of expenditures for different household types Again statistical analysis and regression analysis are employed The results of the first test suggest that household structure independent of the size and income level of the household influences the level of expenditures on particular goods especially basic goods such as housing utilities and food In fact female headed households spend more on average on these goods Not surprisingly this is due to the differential level of public assistance provided to this household type By increasing the household s total resources expenditures on basic consumption is increased The findings of the second test suggest that the structure of the benefit doesn t significantly influence expenditures of either female headed or conventional households Both household types spend slightly less on food when benefits are provided in cash rather than in kind However both households also purchase slightly more housing and utilities This indicates that households make minor adjustments to their

overall household budget Policymakers target particular goods to constrain the recipients expenditures Much to the dismay of policymakers they cannot perfectly constrain the individual because in kind transfers are fungible In this sample food stamps can be substituted for a variety of other basic commodities such as food clothing housing transportation health care and utilities This leads to the conclusion that targeting particular households may improve their overall expenditures on basic commodities But tying benefits to a particular commodity is ineffective because this policy cannot completely constrain individual choice

Sustainable Agriculture and Food Security Vandana Shiva,Gitanjali Bedi,2002-12-02 Sustainable agriculture is based on the sustainable use of natural resources land water and agricultural biodiversity including that of plants and animals The sustainable use of these in turn requires that their ownership and control lie with decentralised agricultural communities to generate livelihoods provide food and conserve natural resources These three dimensions of ecological security livelihood security and food security are the essential elements of an agriculture policy which is sustainable and equitable This book shows how the processes of globalization threaten to undermine all three dimensions and calls for immediate action
