**Transformative Coaching** Sue Askew,Susan Askew,Eileen Carnell,2011 Why publish another book on coaching While there are numerous books covering coaching tools and techniques most share a common focus on goal setting and goal achievement This book offers a rare alternative perspective that focuses on reflective learning as the starting point for professional growth and illustrates how coaches can

apply this approach in coaching meetings Drawing on their research and experiences of developing professional learning programmes for coaches the authors identify three kinds of learning in coaching the learning of new skills and competences learning to see something differently learning more about the self in practice reflective learning The authors contend that while learning of the first and second kinds are well supported in coaching practice more attention to learning of the third kind is needed An emphasis on self reflection for both coaches and coachees can lead to more effective transformative and sustained change to practice Using case studies and examples of successful coaching meetings this thought provoking book explores this reflective model of coaching It also examines current debates in coaching issues to do with self identity and power relationships why peer coaching and supervision are important and how coaching can play a significant role in an organisation s learning Transformative Coaching will be especially useful for coaches and students of coaching working in education organisations including those who offer accredited coaching courses It is also relevant to all learning professionals particularly from the education medical legal and social services sector and to any organisations that place importance on supporting learning Back cover *Achieving Your Masters in Teaching and Learning* Mary McAteer,Lisa Murtagh,Fiona Hallett,Gavin Turnbull,2010-02-09 A core text to support all those embarking on the new Masters in Teaching and Learning MTL **Reflective Learning in Practice** Anne Brockbank,Ian McGill,2017-07-05 This book gathers together details of seventeen case studies of learning in practice after having set the issue of reflective learning in a theoretical context The cases are drawn from a wide range of situations and discuss both apparent successes and failures The cases are used as a basis to develop general findings These general findings are expressed as themes and questions so that as readers come across new circumstances they are not limited by prescriptive recipes Instead they are empowered by having both an open and focused approach open because the starting point is questions rather than answers and focused because the questions direct attention to factors that have been found to be influential for effective reflective learning The crucial factor is the ability of managers and others to extract quality learning from experience Reflective Learning in Practice develops an approach that will help this to happen **Reflective Teaching, Reflective Learning** Thomas M.
