## Same River Twice:

The Same River Twice Chris Offutt, 2003-03-25 Chris Offutt author of the critically acclaimed story collections *Kentucky Straight and Out of the Woods* the novel *The Good Brother* and the memoir *No Heroes* lives in Iowa City Iowa **The Ascent from Nominalism** Terry Penner, 2012-12-06 divisibility in Physics VI I had been assuming at that time that Aristotle's elimination of reference to the infinitely large in his account of the potential infinite like the elimination of the infinitely small from nineteenth century accounts of limits and continuity gave us everything that was important in a theory of the infinite Hilbert's paper showed me that this was not obviously so Suddenly other certainties about Aristotle's apparently judicious toning down of supposed Platonic extremisms began to crumble The upshot of work I had been doing earlier on Plato's Third Man Argument began to look different from the way it had before I was confronted with a possibility I had not till then so much as entertained What if the more extreme positions of Plato on these issues were the more likely to be correct The present work is the first instalment of the resulting reassessment of Plato's metaphysics and especially of his theory of Forms It has occupied much of my teaching and scholarly time over the past fifteen years and more The central question with which I concern myself is How does Plato argue for the existence of his Forms if he does? The idea of making this the central question is that if we know how he argues for the existence of Forms we may get a better sense of what they are The Same River Twice Lauren Coodley, 2018-04 **Platonic Conversations** Mary Margaret McCabe, 2015-05-07 M M McCabe presents a selection of her essays which explore the ways in which the Platonic method of conversation may inform how we understand both the Platonic dialogues and the work of his predecessors and his successors The centrality of conversation to philosophical method is taken here to account both for how we should read the ancients and for the connections between argument knowledge and virtue in the texts in question The book argues that we should attend consequently to the reflective dimension of reading and thought and that this reflection explains both how we should think about the conditions for perception and knowledge and how those conditions in turn inform the theories of value of both Plato and Aristotle *Same River Twice (videocassette)*, 1996 **A History of Greek Philosophy: Volume 1, The Earlier Presocratics and the Pythagoreans** William Keith Chambers Guthrie, 1978 The most striking merits of Guthrie's work are his mastery of a tremendous range of ancient literature and modern scholarship The Elements of Metaphysics William R. Carter, 1990 This brief survey text contains a discussion of a number of representative metaphysical questions and some proposed resolutions to these questions The author offers balanced arguments on debated topics and draws important connections between historical and contemporary work It contains many concrete interesting examples of abstract concepts allowing students to more easily grasp the material American Ethnographic Film and Personal Documentary Scott MacDonald, 2013-06-04 *American Ethnographic Film and Personal Documentary* is a critical history of American filmmakers crucial to the development of ethnographic film and personal documentary The Boston and Cambridge area is notable for

nurturing these approaches to documentary film via institutions such as the MIT Film Section and the Film Study Center the Carpenter Center and the Visual and Environmental Studies Department at Harvard Scott MacDonald uses pragmatism's focus on empirical experience as a basis for measuring the groundbreaking achievements of such influential filmmakers as John Marshall Robert Gardner Timothy Asch Ed Pincus Miriam Weinstein Alfred Guzzetti Ross McElwee Robb Moss Nina Davenport Steve Ascher and Jeanne Jordan Michel Negroponte John Gianvito Alexander Olch Amie Siegel Ilisa Barbash and Lucien Castaing Taylor By exploring the cinematic personal and professional relationships between these accomplished filmmakers MacDonald shows how a pioneering engaged and uniquely cosmopolitan approach to documentary developed over the past half century **The Founders of Western Thought - The Presocratics** Constantine J.

Vamvacas,2009-05-28 There can be little doubt that the Greek tradition of philosophical criticism had its main source in Ionia It thus leads the tradition which created the rational or scientific attitude and with it our Western civilization the only civilization which is based upon science though of course not upon science alone Karl Popper Back to the Presocratics Harvard University physicist and historian of Science Gerald Holton coined the term Ionian Enchantment an expression that links the idea back in the 6th century B C to the ancient Ionians along the eastern Aegean coast while capturing its fascination Approximately within a seventy year period 600-525 B C a split second in the history of humanity the three Milesian thinkers Thales Anaximander and Anaximenes without plain evidence but with an unequalled power of critical abstraction and intuition had achieved a true intellectual revolution they founded and bequeathed to future generations a new unprecedented way of theorizing the world it could be summarized in four statements beneath the apparent disorder and multiplicity of the cosmos there exists order unity and stability unity derives from the fundamental primary substratum from which the cosmos originated this and consequently the cosmic reality is one and is based not on supernatural but on physical causes they are such that man can investigate them rationally These four statements are neither self-evident nor self-explanatory *The Same River Twice* Mary Wescott,1987 The doctrine of salvation Augustus Hopkins Strong,1909
