Table 1. A traditional approach versus Safe System approach to transportation safety*

	Traditional Approach	Safe System Approach
Inherent problem or target?	Crashes	Fatalities and serious injuries
Causes of the problem?	Human behavior	Larger system of factors leading to the context and conditions in which the injury or fatality occurred
Who is responsible?	Individual road users	Agencies and organizations that create the system (e.g., policymakers, planners, engineers)
Underlying intervention approach?	Incremental, reactive treatement where crashes have occurred	Proactive, systemic approach to creating a safe road network and system
What is the safety goal?	An optimal reduction in fatalities and serious injuries based on previous trends	Zero fatalities and serious injuries is the only morally acceptable target
