Methods And Methodology In Composition Research:

Methods and Methodology in Composition Research Gesa Kirsch, Patricia A. Sullivan, 1992 In original essays fourteen nationally known scholars examine the practical philosophical and epistemological implications of a variety of research traditions Included are discussions of historical theoretical and feminist scholarship case study and ethnographic research text and conversation analysis and cognitive experimental and descriptive research Issues that cross methodological boundaries such as the nature of collaborative research and writing methodological pluralism the classification and coding of research data and the politics of composition research are also examined Contributors reflect on their own research practices and so reflect the current state of composition research itself Theories and Methods of Writing Center Studies Jo Mackiewicz, Rebecca Babcock, 2019-11-01 This collection helps students and researchers understand the foundations of writing center studies in order to make sound decisions about the types of methods and theoretical lenses that will help them formulate and answer their research questions In the collection accomplished writing center researchers discuss the theories and methods that have enabled their work providing readers with a useful and accessible guide to developing research projects that interest them and make a positive contribution It introduces an array of theories including genre theory second language acquisition theory transfer theory and disability theory and guides novice and experienced researchers through the finer points of methods such as ethnography corpus analysis and mixed methods research Ideal for courses on writing center studies and pedagogy it is essential reading for researchers and administrators in writing centers and writing across the curriculum or writing in the disciplines programs **Institutional Ethnography** Michelle LaFrance, 2019-06-15 A form of critical ethnography introduced to the social sciences in the late 1990s institutional ethnography uncovers how things happen within institutional sites providing a new and flexible tool for the study of how work is co constituted within sites of writing and writing instruction The study of work and work processes reveals how institutional discourse social relations and norms of professional practice coordinate what people do across time and sites of writing Adoption of IE offers finely grained understandings of how our participation in the work of writing writing instruction and sites of writing gives material face to the institutions that govern the social world In this book Michelle LaFrance introduces the theories rhetorical frames and methods that ground and animate institutional ethnography Three case studies illustrate key aspects of the methodology in action tracing the work of writing assignment design in a linked gateway course the ways annual reviews coordinate the work of faculty and writing center administrators and staff and how the key term information literacy socially organizes teaching in a first year English program Through these explorations of the practice of ethnography within sites of writing and writing instruction LaFrance shows that IE is a methodology keenly attuned to the material relations and conditions of work in twenty first century writing studies contexts ideal for both practiced and novice ethnographers who seek to understand the actualities of social organization and lived experience in the sites they study Institutional Ethnography expands the field s

repertoire of research methodologies and offers the grounding necessary for work with the IE framework It will be invaluable to writing researchers and students and scholars of writing studies across the spectrum composition and rhetoric literacy studies and education as well as those working in fields such as sociology and cultural studies

Ethnographic Writing Research Wendy Bishop,1999 The primary goal of Ethnographic Writing Research is to help you conduct your day to day research whether it means developing an informal classroom report writing a dissertation prospectus and study or participating in local civic literacy research

Composing Research Cindy Johaneck,2000-04 Cindy Johaneck offers a new perspective on the ideological conflict between qualitative and quantitative research approaches and the theories of knowledge that inform them With a paradigm that is sensitive to the context of one's research questions she argues scholars can develop less dichotomous forms that invoke the strengths of both research traditions Context oriented approaches can lift the narrative from beneath the numbers in an experimental study for example or bring the useful clarity of numbers to an ethnographic study A pragmatic scholar Johaneck moves easily across the boundaries that divide the field and argues for contextualist theory as a lens through which to view composition research This approach brings with it a new focus she writes This new focus will call us to attend to the contexts in which rhetorical issues and research issues converge producing varied forms many voices and new knowledge indeed reconstructing a discipline that will be simultaneously focused on its tasks its knowledge makers and its students Composing Research is a work full of personal voice and professional commitment and will be a welcome addition to the research methods classroom and to the composition researcher's own bookshelf 2000 Outstanding Scholarship Award from the International Writing Centers Association

Handbook of Writing and Text Production Eva-Maria Jakobs, Daniel Perrin, 2014-02-27 Writing matters and so does research into real life writing The shift from an industrial to an information society has increased the importance of writing and text production in education in everyday life and in more and more professions in the fields of economics and politics science and technology culture and media Through writing we build up organizations and social networks develop projects inform colleagues and customers and generate the basis for decisions The quality of writing is decisive for social resonance and professional success This ubiquitous real life writing is what the present handbook is about The de Gruyter Handbook of Writing and Text Production brings together and systematizes state of the art research The volume contains five sections focussing on I the theory and methodology of writing and text production research as well as on problem oriented and problem solving approaches related to II authors III modes and media IV genres and V domains

of writing and text production Throughout the 21 chapters exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions Both established and future scholars can benefit from the handbook's fresh approach to writing in the context of multimodal multi semiotic text production Twenty Writing Assignments in Context Melissa Bender, Karma Waltonen, 2017-01-11 Twenty original classroom tested assignments This innovative collection of college writing assignments explores the practical applications of each lesson Drawing upon current best practices each chapter includes a discussion of the rationale behind the assignment along with supplemental elements such as guidelines for evaluation prewriting exercises and tips for avoiding common pitfalls The assignments are designed for a range of courses from first year composition to upper division writing in various disciplines *Keywords in Composition Studies* Paul Heilker, Peter Vandenberg, 1996 *Keywords in Composition Studies* is the first systematic inquiry into the vocabulary of writing teachers and theorists In brief yet heavily researched essays contributors explore the development of and interconnections among fifty five of the most consequential words in the field It is with these critical terms that the contemporary field of composition has been composed and in this sense *Keywords in Composition Studies* is an introduction to the principal ideas and ideals of compositionists Yet this book is neither a dictionary nor an encyclopedia it does not attempt to capture the established knowledge of a unified discipline through its vocabulary but rather explores the multiple layers of meaning inhabiting the words writing teachers and theorists have depended and continue to depend on most Each essay begins with the assumption that its central term is important precisely because its meaning is open overdetermined The purpose of each essay is to foreground a range of meaning signified by its central term rather than to pinpoint a meaning In this sense *Keywords in Composition Studies* is a practical model for reading the texts of an expanding and unsettled field

Verbal Communication Andrea Rocci, Louis de Saussure, 2016-03-07 Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures Most communication researchers have to deal with issues of language use in their work Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous or elicited verbal productions Despite its pervasiveness verbal communication does not currently define one cohesive and distinct subfield within the communication discipline The Handbook of Verbal Communication seeks to address this gap In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences The interaction of linguistic research with the social sciences has produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers an extensive discussion of the explicit and implicit meanings of verbal messages with a focus on emotive and figurative meanings Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention Different contexts of language use are considered from the mass media and the new media to the organizational contexts Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation A key feature of the volume is the coverage of verbal communication quality Quality is examined both from a cognitive and from a social perspective It covers topics that range from the cognitive processes underlying deceptive communication to the methods that can be used to assess the quality of texts in an organizational context
