

The 9 Problem Solving Strategies

1 Look for the important words in the question

Write them down.

Underline them.

Make sure I know what to do.

2 Look for a pattern

Can I see something happening over and over again?

Will this help me solve the problem?

3 Have a go

Try an answer.

Does the answer make sense?

4 Use a table or a chart

Will something like this help?

5 Use a drawing

Can I draw something about the problem?

Will this help me to find the answer?

6 Work backwards

Can I start at the end of the question to help work it out?

Will my answer work?

7 Try an easier problem

Can I change the numbers in the question to make it simpler?

Will this make finding the answer easier?

8 Make a model

Can I use paper or blocks to help me find the answer?

Can I use people to help me find the answer?

9 Think logically

Can I tell something about the answer straight away?

Can I get rid of answers that are not correct?
